

Jérôme Durand-Lose · Benedek Nagy (Eds.)

Machines, Computations, and Universality

7th International Conference, MCU 2015
Famagusta, North Cyprus, September 9–11, 2015
Proceedings

Contents

Invited Papers

Decidability Problems for Self-induced Systems Generated by a Substitution.	3
<i>Timo Jolivet and Anne Siegel</i>	
Towards Formal Verification of Computations and Hypercomputations in Relativistic Physics	17
<i>Mike Stannett</i>	

Regular Papers

A Connection Between Red-Green Turing Machines and Watson-Crick TOL Systems	31
<i>Erzsébet Csuhaj-Varjú, Rudolf Freund, and György Vaszil</i>	
Tight Bounds for Cut-Operations on Deterministic Finite Automata.	45
<i>Frank Drewes, Markus Holzer, Sebastian Jakobi, and Brink van der Merwe</i>	
Non-isometric Contextual Array Grammars with Regular Control and Local Selectors	61
<i>Henning Fernau, Rudolf Freund, Rani Siromoney, and K.G. Subramanian</i>	
Universality of Graph-controlled Leftist Insertion-deletion Systems with Two States	79
<i>Sergiu Ivanov and Sergey Verlan</i>	
Tinput-Driven Pushdown Automata.	94
<i>Martin Kutrib, Andreas Malcher, and Matthias Wendlandt</i>	
Reversible Limited Automata	113
<i>Martin Kutrib and Matthias Wendlandt</i>	
An Intrinsically Universal Family of Causal Graph Dynamics.	129
<i>Simon Martiel and Bruno Martin</i>	
The Simulation Powers and Limitations of Hierarchical Self-Assembly Systems	149
<i>Jacob Hendricks, Matthew J. Patitz, and Trent A. Rogers</i>	

A Characterization of NP Within Interval-Valued Computing	164
<i>Benedek Nagy and Sándor Vályi</i>	
Universality in Infinite Petri Nets	180
<i>Dmitry A. Zaitsev</i>	
Author Index	199
