Computer Performance Engineering

12th European Workshop, EPEW 2015
Madrid, Spain, August 31 – September 1, 2015
Proceedings

Contents

Applications I

A Markovian Queueing System for Modeling a Smart Green Base Station . . .	3
<i>Ioannis Dimitriou, Sara Alouf, and Alain Jean-Marie</i>	
Static and Dynamic Hosting of Cloud Servers	19
<i>Paul Ezhilchelvan and Isi Mitrani</i>	
Security and Performance Tradeoff Analysis of Mobile Offloading Systems Under Timing Attacks	32
<i>Tianhui Meng, Katinka Wolter, and Qiushi Wang</i>	
Non-Markovian Performability Evaluation of ERTMS/ETCS Level 3	47
<i>Laura Carnevali, Francesco Flammini, Marco Paolieri, and Enrico Vicario</i>	

Modelling Techniques I

Simplifying Layered Queueing Network Models.	65
<i>Farhana Islam, Dorina Petriu, and Murray Woodside</i>	
Moment-Generating Algorithm for Response Time in Processor Sharing Queueing Systems.	80
<i>Tiberiu Chis and Peter Harrison</i>	
On Generalized Processor Sharing and Objective Functions: Analytical Framework.	96
<i>Jasper Vanlerberghe, Joris Walraevens, Tom Maertens, Stijn De Vuyst, and Herwig Bruneel</i>	

Software Performance

Comparing the Accuracy of Resource Demand Measurement and Estimation Techniques.	115
<i>Felix Willnecker, Markus Dlugi, Andreas Brunnert, Simon Spinner, Samuel Kounev, Wolfgang Gottesheim, and Helmut Krcmar</i>	
Estimating the Impact of Code Additions on Garbage Collection Overhead. . .	130
<i>Peter Libiř, Lubomír Bulej, Vojtěch Horký, and Petr Tůma</i>	

Performance Awareness in Java EE Development Environments	146
<i>Alexandru Danciu, Alexander Chrusciel, Andreas Brunnert, and Helmut Krcmar</i>	

Modelling Techniques II

Canonical Form of Order-2 Non-stationary Markov Arrival Processes	163
<i>András Mészáros and Miklós Telek</i>	
Markov Decision Petri Nets with Uncertainty	177
<i>Marco Beccuti, Elvio G. Amparore, Susanna Donatelli, Dimitri Scheftelowitsch, Peter Buchholz, and Giuliana Franceschinis</i>	
On-the-fly Fluid Model Checking via Discrete Time Population Models	193
<i>Diego Latella, Michele Loreti, and Mieke Massink</i>	
Computing Response Time Distributions Using Iterative Probabilistic Model Checking	208
<i>Freek van den Berg, Jozef Hooman, Arnd Hartmanns, Boudewijn R. Haverkort, and Anne Remke</i>	

Applications II

iDSL: Automated Performance Prediction and Analysis of Medical Imaging Systems	227
<i>Freek van den Berg, Anne Remke, and Boudewijn R. Haverkort</i>	
Stream Processing on Demand for Lambda Architectures	243
<i>Johannes Kroy, Andreas Brunnert, Christian Prehofer, Thomas A. Runkler, and Helmut Krcmar</i>	
An AnyLogic Simulation Model for Power and Performance Analysis of Data Centres.	258
<i>Björn F. Postema and Boudewijn R. Haverkort</i>	

Simulation Techniques

Rare Event Simulation with Fully Automated Importance Splitting	275
<i>Carlos E. Budde, Pedro R. D'Argenio, and Holger Hermanns</i>	
Speed-Up of Stochastic Simulation of PCTMC Models by Statistical Model Reduction	291
<i>Cheng Feng and Jane Hillston</i>	

Author Index	307
