Survey Data Collection and Integration

Contents

Part I Introduction to Statistical Surveys

Surveys: Critical Points, Challenges and Need for Development	3
Luigi Biggeri	
1 Introduction	3
2 Frameworks to Specify and Organize the Presentation of the Critical Issues of Statistical Surveys	4
2.1 The Total Quality Management Approach	4
2.2 The Production Process of a Survey: Different Perspectives of the Life Cycle of a Survey	6
3 Critical Issues, Challenges and Need for Development of Statistical Surveys	9
3.1 Why are There Still Critical Issues?	9
3.2 Mode of Collection of Data and Construct of a Questionnaire	10
3.3 Sampling Design and Estimation that Reply to the Demands of the Users	12
3.4 Data Dissemination and Standardisation	14
4 Concluding Remarks	16
References	16

Part II Questionnaire Design

Measurement Scales for Scoring or Ranking Sets of Interrelated Items	21
Luigi Fabbri	
1 Introduction	21
2 Survey Procedures	22
2.1 Ranking	22
2.2 Picking the Best/Worst Item	23

2.3	Fixed Total Partitioning	23
2.4	Rating Individual Items	24
2.5	Paired Comparisons	25
2.6	Conjoint Attribute Measurement	25
3	Statistical Properties of the Scales	26
3.1	Ranking	29
3.2	Pick the Best/Worst	31
3.3	Fixed Budget Partitioning	31
3.4	Rating	32
3.5	Paired Comparisons	33
4	Practical Considerations	34
4.1	Ranking	35
4.2	Picking the Best/Worst.	36
4.3	Fixed Total Partitioning	36
4.4	Rating	37
4.5	Paired Comparisons	38
5	Concluding Remarks	39
	References	41

Assessing Multi-Item Scales for Subjective Measurement 45

Cristina Davino and Rosaria Romano

1	Introduction	45
2	Subjective Measurement in the Social Sciences.	46
3	An Empirical Analysis: Assessing Students' University Quality of Life	47
3.1	The Survey	47
3.2	Univariate and Bivariate Analysis	48
4	An Innovative Multivariate Approach	51
4.1	The Methodology	53
4.2	Main Results.	55
5	Concluding Remarks and Further Developments	58
	References	58

Statistical Tools in the Joint Analysis of Closed and Open-Ended Questions 61

Simona Balbi and Nicole Triunfo

1	Introduction	61
2	Textual Data Analysis	62
3	Pre-Processing and Choosing a Proper Coding and Weighting System in TDA	62
4	Correspondence Analysis	63
4.1	Lexical Correspondence Analysis	65
4.2	Lexical Non Symmetrical Correspondence Analysis.	67
5	Conjoint Analysis with Textuals External Information	68

5.1 The Watch Market	70
6 Concluding Remarks	71
References	72

The Use of Self-Anchoring Scales in Social Research:

The Cantril Scale for the Evaluation of Community

Action Orientation	73
Immacolata Di Napoli and Caterina Arcidiacono	
1 Introduction	73
2 Measuring Attitudes and Opinions	74
2.1 The Likert Scale	75
2.2 Reflexivity and the Self-Anchoring Scale	75
3 The Construction of a Self-Anchoring Scale for Community Action Orientation	79
3.1 Preliminary Steps	79
3.2 Identifying Indicators of Community Action Orientation	79
3.3 The Community Action Orientation Scale	80
4 Final Considerations	82
References	83

Part III Sampling Design and Error Estimation

Small Area Estimation of Poverty Indicators	89
Monica Pratesi, Caterina Giusti and Stefano Marchetti	
1 Introduction	89
2 Poverty Indicators	90
3 Small Area Methods for the Estimation of Poverty Indicators	92
4 Estimation of Poverty Indicators at Provincial Level in Tuscany	95
5 Conclusions	100
References	100

Non-Sampling Errors in Household Surveys:

The Bank of Italy's Experience

Giovanni D'Alessio and Giuseppe Ilardi	
1 Introduction	103
2 The Survey on Household Income and Wealth	104
3 Unit Non-Response and Measurement Errors in the SHIW: Some Empirical Studies	105
3.1 The Analysis of Unit Non-Response	105
3.2 Measurement Errors: Uncorrelated Errors	108
3.3 Measurement Errors: Underreporting	113
4 Concluding Remarks	116
References	117

Part IV Data Integration

Enriching a Large-Scale Survey from a Representative Sample by Data Fusion: Models and Validation	121
Tomàs Aluja-Banet, Josep Daunis-i-Estadella and Yan Hong Chen	
1 Introduction to Data Fusion	122
2 Conditions for Data Fusion	123
3 Steps for a Data Fusion	124
3.1 Selection of the Hinge Variables	124
3.2 Grafting the Recipient in the Space of Donors	126
3.3 Choosing the Imputation Model	126
3.4 Validation Tools	128
4 Significance of the Validation Statistics	132
5 Application to Official Statistics	132
6 Conclusions	136
References	136
 A Business Survey on Job Vacancies: Integration with Other Sources and Calibration	139
Diego Bellisai, Stefania Fivizzani and Marina Sorrentino	
1 Introduction	139
2 Main Characteristics of the Job Vacancy Survey	140
3 Editing and Imputation	143
3.1 Job Vacancies: Peculiarities, Implications and Editing and Imputation Methods	144
4 Calibration	148
5 Concluding Remarks	151
References	152
 About the Authors	153
