

Akihiro Yamamoto · Takuya Kida
Takeaki Uno · Tetsuji Kuboyama (Eds.)

Discovery Science

20th International Conference, DS 2017
Kyoto, Japan, October 15–17, 2017
Proceedings

Contents

Online Learning

Context-Based Abrupt Change Detection and Adaptation for Categorical Data Streams	3
<i>Sarah D'Ettorre, Herna L. Viktor, and Eric Paquet</i>	
A New Adaptive Learning Algorithm and Its Application to Online Malware Detection	18
<i>Ngoc Anh Huynh, Wee Keong Ng, and Kanishka Ariyapala</i>	
Real-Time Validation of Retail Gasoline Prices.	33
<i>Mondelle Simeon and Howard J. Hamilton</i>	

Regression

General Meta-Model Framework for Surrogate-Based Numerical Optimization.	51
<i>Žiga Lukšič, Jovan Tanevski, Sašo Džeroski, and Ljupčo Todorovski</i>	
Evaluation of Different Heuristics for Accommodating Asymmetric Loss Functions in Regression	67
<i>Andrei Tolstikov, Frederik Janssen, and Johannes Fürnkranz</i>	
Differentially Private Empirical Risk Minimization with Input Perturbation	82
<i>Kazuto Fukuchi, Quang Khai Tran, and Jun Sakuma</i>	

Label Classification

On a New Competence Measure Applied to the Dynamic Selection of Classifiers Ensemble	93
<i>Marek Kurzynski and Pawel Trajdos</i>	
Multi-label Classification Using Random Label Subset Selections	108
<i>Martin Breskvar, Dragi Kocev, and Sašo Džeroski</i>	
Option Predictive Clustering Trees for Hierarchical Multi-label Classification	116
<i>Tomaž Stepišnik Perdiš, Aljaž Osojnik, Sašo Džeroski, and Dragi Kocev</i>	

Deep Learning

Re-training Deep Neural Networks to Facilitate Boolean Concept Extraction	127
<i>Camila González, Eneldo Loza Mencía, and Johannes Fürnkranz</i>	

An In-Depth Experimental Comparison of RNTNs and CNNs for Sentence Modeling.	144
<i>Zahra Ahmadi, Marcin Skowron, Aleksandrs Stier, and Stefan Kramer</i>	

Feature Selection

Improving Classification Accuracy by Means of the Sliding Window Method in Consistency-Based Feature Selection	155
<i>Adrian Pino Angulo and Kilho Shin</i>	

Feature Ranking for Multi-target Regression with Tree Ensemble Methods. . .	171
<i>Matej Petković, Sašo Džeroski, and Dragi Kocev</i>	

Recommendation System

Recommending Collaborative Filtering Algorithms Using Subsampling Landmarkers	189
<i>Tiago Cunha, Carlos Soares, and André C.P.L.F. de Carvalho</i>	

Community Detection

Recursive Extraction of Modular Structure from Layered Neural Networks Using Variational Bayes Method.	207
<i>Chihiro Watanabe, Kaoru Hiramatsu, and Kunio Kashino</i>	

Discovering Hidden Knowledge in Carbon Emissions Data: A Multilayer Network Approach.	223
<i>Kartikeya Bhardwaj, HingOn Miu, and Radu Marculescu</i>	

Topic Extraction on Twitter Considering Author's Role Based on Bipartite Networks	239
<i>Takako Hashimoto, Tetsuji Kuboyama, Hiroshi Okamoto, and Kilho Shin</i>	

Pattern Mining

Mining Strongly Closed Itemsets from Data Streams	251
<i>Daniel Trabold and Tamás Horváth</i>	

Extracting Mutually Dependent Multisets	267
<i>Natsuki Kiyota, Sho Shimamura, and Kouichi Hirata</i>	

Bioinformatics

LOCANDA: Exploiting Causality in the Reconstruction of Gene
Regulatory Networks 283
*Gianvito Pio, Michelangelo Ceci, Francesca Prisciandaro,
and Donato Malerba*

Discovery of Salivary Gland Tumors' Biomarkers via Co-Regularized
Sparse-Group Lasso. 298
*Sultan Imangaliyev, Johannes H. Matse, Jan G.M. Bolscher,
Ruud H. Brakenhoff, David T.W. Wong, Elisabeth Bloemena,
Enno C.I. Veerman, and Evgeni Levin*

Knowledge Discovery

Measuring the Inspiration Rate of Topics in Bibliographic Networks 309
Livio Bioglio, Valentina Rho, and Ruggero G. Pensa

Discovering Minority Sub-clusters and Local Difficulty Factors
from Imbalanced Data 324
*Mateusz Lango, Dariusz Brzezinski, Sebastian Firlik,
and Jerzy Stefanowski*

Fusion Techniques for Named Entity Recognition and Word Sense
Induction and Disambiguation 340
Edmundo-Pavel Soriano-Morales, Julien Ah-Pine, and Sabine Loudcher

Author Index 357
