## Abstract / Kurzfassung

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Changes of stratospheric water concentrations	1
1.2	Water transport across the tropical tropopause	2
1.3	Freeze-drying at the tropical tropopause	3
1.4	Scope of this work	4
<b>2</b>	<b>Measurement of water in the upper troposphere and lower stratosphere</b>	<b>5</b>
2.1	The Fast In-situ Stratospheric Hygrometer	5
2.2	Calibration of FISH	6
2.3	Field comparison of FISH with other hygrometers	8
2.4	The AquaVIT laboratory comparison experiment	10
<b>3</b>	<b>Tropical aircraft missions</b>	<b>13</b>
<b>4</b>	<b>Water in the tropical tropopause layer</b>	<b>17</b>
4.1	Vertical profiles of H <sub>2</sub> O	17
4.2	Dehydration at the tropical tropopause	20
4.2.1	Saturation history	21
4.2.2	Tropical regions of dehydration	22
4.2.3	Reconstruction of water with HALOE climatological data	24
4.3	Moistening by deep convection	27
4.4	Model-observation-based studies of the TTL structure	29
<b>5</b>	<b>Ice clouds and saturation at the tropical tropopause</b>	<b>33</b>
5.1	Ice water content and hydration/dehydration potential of cirrus particles	33
5.1.1	Observation of specific cirrus	33
5.1.2	Climatology of the ice water content	35
5.2	Ice supersaturation and cirrus clouds	38
5.3	Does HNO <sub>3</sub> matter?	41
<b>6</b>	<b>Conclusions and outlook</b>	<b>43</b>
	<b>Acknowledgements</b>	<b>47</b>
	<b>Abbreviations and acronyms</b>	<b>49</b>
	<b>References</b>	<b>51</b>
