Poaceae – General Information

Description of the Family, Vegetative Morphology and Anatomy	3
Vegetative Morphology and Anatomy	3
Roots	3
Stems	5
Leaves	8
References	18
Inflorescence Structure	25
Transition to flowering	26
Bract formation and inflorescence phyllotaxis	28
Numbers of orders of branching	29
Numbers of branches or spikelets at each order of branching	30
Branch angle	31
Axis elongation	31
Spikelets	32
Disarticulation	34
References	35
Flower Structure	39
References	42
Embryology	45
Ovule	45
Megagametophyte	46
Embryo	46
Endosperm	48
References	51
Karyology and Genome Structure	55
Chromosome number	55
Polyploidy	56
Genome size	57
Genome mapping, sequencing and conservation of gene order	58
GC content	58
References	59
Pollen	63
Morphology and anther structure	63
Pollination	64
Pollen transfer	64
Pollen germination and pollen tube growth	65
References	66

Fruit and Seed	69
Dispersal	70
Unassisted or wind dispersal	71
Dispersal in time: seed dormancy	71
Dispersal by animals	72
Role of the awn	73
Forcible dispersal	74
References	75
Phytochemistry	77
Phenolics	78
Derivatives of amino acids (tryptophan, phenylalanine, tyrosine)	79
Terpenoids	80
Chemicals produced by symbionts or pathogens	82
Phytosiderophores	82
References	83
Distribution, Habitats and Conservation	87
Distribution and maintenance of grasslands	87
Distribution of major clades	88
Species diversity	88
Conservation and response to climate change	89
References	90
Reproductive Systems	93
Unisexual vs. bisexual flowers	93
Self-pollination and self-incompatibility systems	94
Cleistogamy	95
Barriers to interspecific crossing	96
Asexual reproduction	97
References	99
Fossil Record and Dates of Diversification	103
References	106
Domestication	109
Origins of major cereal crops	109
Morphological changes in domestication	112
Genetic and genomic changes in domestication	114
References	116
Affinities	121
References	122
Classification of the Poaceae	
Subdivision of the Family	127
Key to the Subfamilies	129
References	130
I. Subfamily Anomochlooideae Pilg. ex Potztal (1957)	131
Key to the Genera of Anomochlooideae	131
Spikelet Clade	132
References	133
II. Subfamily Pharoideae L.G. Clark & Judz. (1996)	135
Key to the Genera of Pharoideae	135
Genera of Pharoideae	135

Bistigmatic clade	136
References	137
III. Subfamily Puelioideae L.G. Clark et al. (2000)	139
Key to the Genera	139
BEP plus PACMAD clades	139
BEP clade	139
References	142
IV. Subfamily Ehrhartoideae Link (1827)	143
Key to the Genera	144
Ehrhartoideae Incertae Sedis	144
I. Tribe Phyllorachideae C.E. Hubbard (1939)	144
II. Tribe Ehrharteae Nevski (1937)	145
III. Tribe Oryzeae Dumort. (1824)	146
III.1. Subtribe Oryzinae Griseb. (1853)	146
III.2. Subtribe Zizaniinae Benth. (1881)	147
References	149
V. Subfamily Bambusoideae Luer ss. (1893)	151
Tribes and Subtribes of Bambusoideae	154
Key to the Genera of Bambusoideae	154
Group I – Herbaceous bamboos	155
Group II – Branch complement of two or more subequal branches	155
Group III – Branch complement with one branch only or one dominant branch and two to many smaller laterals	157
Tribes and Genera of Bambusoideae	159
IV. Tribe Arundinarieae Asch. & Graebn. (1902)	159
V. Tribe Bambuseae Kunth ex Dumort. (1829)	169
Neotropical clade	169
Paleotropical clade	176
VI. Tribe Olyreae Martinov (1820)	189
References	195
VI. Subfamily Pooideae Benth. (1861)	199
Tribes and Subtribes of Pooideae	200
Key to the Genera of Pooideae	200
Group I – Unbranched inflorescences	200
Group II – Inflorescence axis branched, spikelets without awns	202
Group III – Inflorescence branched, spikelets awned, the awn straight	204
Group IV – Inflorescence branched, spikelets awned, the awn curved, twisted or geniculate	205
Tribes and Genera of Pooideae	207
VII. Tribe Brachyelytreae Ohwi (1941)	207
VIII. Tribe Nardeae W. D. J. Koch (1837)	208
IX. Tribe Phaenospermateae Renvoize & Clayton (1985)	209
X. Tribe Stipeae Dumort. (1824)	211
XI. Tribe Meliceae Rchb. (1828)	219
XII. Tribe Diarrheneae C.S. Campb. (1985)	221
XIII. Tribe Brachypodieae Harz (1880)	222
XIV. Tribe Bromeae Dumort. (1824)	223
XV. Tribe Triticeae Dumort. (1824)	223
XVI. Tribe Poeae R. Br. (1814), s.l.	229
References	260

PACMAD Clade	267
VII. Subfamily Aristidoideae Caro (1982)	267
Key to the Genera of Aristidoideae	268
Genera of Aristidoideae	268
References	269
VIII. Subfamily Panicoideae Link (1827)	271
Tribes and Subtribes of Panicoideae	272
Key to the Genera of Panicoideae	272
Group I – Inflorescence unbranched	274
Group II – Inflorescence branched; inflorescence or branch axes disarticulating at the nodes	276
Group III – Inflorescence branches unbranched, not disarticulating	278
Group IV – Primary branches of inflorescence branched, although branches sometimes very short	279
Tribes and Genera of Panicoideae	281
XVII. Tribe Steyermarkochloae Davidse & R.P. Ellis (1984)	281
XVIII. Tribe Tristachyideae Sánchez-Ken & L.G. Clark (2010)	282
XIX. Tribe Chasmanthieae W. V. Br. & B. N. Smith ex Sánchez-Ken & L. G. Clark (2010)	284
XX. Tribe Gynerieae Sánchez-Ken & L.G. Clark (2001)	286
XXI. Tribe Centothecae Ridl. (1907)	286
XXII. Tribe Andropogoneae Dumort. (1824)	289
XXIII. Tribe Paspaleae J. Presl (1830)	314
XXIV. Tribe Paniceae R. Br. in Flinders (1814)	323
References	342
IX. Subfamily Danthonioideae N.P. Barker & H.P. Linder (2001)	347
Key to the Genera of Danthonioideae	347
Genera of Danthonioideae	348
References	352
X. Subfamily Chloridoideae Kunth ex Beilschm. (1833)	353
Tribes and Subtribes of Chloridoideae	354
Key to the Genera of Chloridoideae	354
Group I – Inflorescences unbranched, with spikelets sessile or pedicellate; spike-like panicles may also key here	354
Group II – Inflorescence with two or more unbranched branches, either digitate or spread along the main axis	355
Group III – Inflorescence branches themselves branched, at least some spikelets borne on secondary or higher-order branches, the spikelets mostly pedicellate	358
Tribes and Genera of Chloridoideae	359
XXV. Tribe Centropodieae P.M. Peterson, N.P. Barker & H.P. Linder (2011)	359
XXVI. Tribe Triraphideae P.M. Petersen (2010)	362
XXVII. Tribe Eragrostideae Stapf (1898)	363
XXVIII. Tribe Zoysieae Benth. (1881)	369
XXIX. Tribe Cynodonteae Dumort. (1824)	371
References	395
XI. Subfamily Micrairoideae Pilg. (1956)	399
Key to the Genera of Micrairoideae	399
Genera of Micrairoideae	400
References	402

XII. Subfamily Arundinoideae Burmeister (1837)	403
Key to the Genera of Arundinoideae	403
Genera of Arundinoideae	404
References	408
Index	409
