1	Gaping at the Moon—18th and 19th Century Ideas on the Formation of Lunar Craters and Other Surface Features	1
1.1	Introduction	1
1.2	Hooke and Herschel	2
1.3	Schröter and Gruithuisen	3
1.4	Beer, Mädler and Althans	7
1.5	Dana and Proctor	9
1.6	Nasmyth, Carpenter, and Neison	11
1.7	Meydenbauer and the Thiersches	13
1.8	Concluding Remarks	16
	References	17
2	Lunar Observations and Speculations—From Gilbert to the Apollo Explorations	19
2.1	Introduction	19
2.2	Gilbert's Analysis	19
2.3	Immediate Reactions to Gilbert's Ideas—Davis and Althans	22
2.4	Meteor Crater in Arizona	24
2.5	Shaler	25
2.6	Morozov	27
2.7	Günther	29
2.8	Öpik	30
2.9	Wegener	33
2.10	Delmotte and Darney	37
2.11	Spurr	38
2.12	Baldwin	39
2.13	Dietz	41
2.14	Kuiper and Urey	43

2.15	Concluding Remarks	47
	References	47
3	Pre-Apollo Theories About the Origin of the Moon	51
3.1	Introduction	51
3.2	Pre-Apollo Estimates for the Age of the Moon	51
3.3	Pre-Apollo Theories for the Formation of the Moon	54
3.3.1	Rotational Fission	55
3.3.2	Collisional Fission	59
3.3.3	Co-accretion	60
3.3.4	Capture	68
3.4	Concluding Remarks	72
	References	73
4	Exploring the Moon—The Apollo Investigations	77
4.1	Introduction	77
4.2	The Apollo Explorations	79
4.2.1	Apollo 11	79
4.2.2	Apollo 12	91
4.2.3	Apollo 13	94
4.2.4	Apollo 14	94
4.2.5	Apollo 15	95
4.2.6	Apollo 16	101
4.2.7	Apollo 17	103
4.3	Concluding Remarks	104
	References	107
5	Post-Apollo Synthesis and Debate	111
5.1	Introduction	111
5.2	O’Keefe’s Arguments for Fission	111
5.3	The Fourth Lunar Science Conference	113
5.4	Harold Urey’s 80th Birthday	114
5.5	The Lunar Petrology Conference	115
5.6	The Fifth Lunar Science Conference	117
5.7	The Conference on Satellites of the Solar System	119
5.8	The Sixth Lunar Science Conference	121
5.9	The Seventh Lunar Science Conference	122
5.10	The Eighth Lunar Science Conference	126
5.11	The Ninth Lunar and Planetary Science Conference	132
5.12	The Tenth Lunar and Planetary Science Conference	133
5.13	Basaltic Volcanism on the Terrestrial Planets	135
5.14	The Eleventh Lunar and Planetary Science Conference	137
5.15	Concluding Remarks	138
	References	138

6	Widening the Research Front	141
6.1	Introduction	141
6.2	Meteorites	141
6.3	Workshop on Early Crustal Genesis: Implications from Earth	143
6.4	The Snowbird Conferences	144
6.5	Discussions on the Formation of the Moon in a Planetary Context	146
6.6	Planning for a Conference on the Origin of the Moon	148
6.7	The Fourteenth Lunar and Planetary Science Conference	150
6.8	Conferences and Workshops on Planetary Issues—The Impact of Lunar Research	151
6.9	Concluding Remarks	155
	References	155
7	The Kona Conference—Day 1	157
7.1	Introduction	157
7.2	Invited Reviews	157
7.2.1	Larimer	158
7.2.2	Wetherill	159
7.2.3	Drake	168
7.2.4	(Jeffrey) Taylor	169
7.2.5	Hood	174
7.2.6	Burns	174
7.3	Geophysical Constraints	175
7.3.1	Turcotte	175
7.3.2	Matsui and Abe	177
7.3.3	Binder	178
7.3.4	Solomon	179
7.3.5	Yoder	182
7.3.6	Russell	183
7.3.7	Cisowski and Fuller	185
7.3.8	Banerjee	187
7.3.9	Runcorn	189
7.4	Concluding Remarks	190
	References	190
8	The Kona Conference—Day 2	193
8.1	Introduction	193
8.2	Chemical and Petrological Constraints	193
8.2.1	Newsom	193
8.2.2	Ringwood and Seifert	195
8.2.3	Delano	196
8.2.4	Dickinson and Newsom	197

8.2.5	Goodrich and Barnes	197
8.2.6	Warren and Rasmussen	198
8.2.7	Warren	199
8.2.8	Goettel	199
8.2.9	Shervais and (Lawrence) Taylor	200
8.2.10	Kreutzberger, Drake, and Jones	201
8.2.11	Koeberl	202
8.2.12	Swindle, Caffee, and Hohenberg	203
8.2.13	(Ross) Taylor	205
8.3	Dynamical Constraints	207
8.3.1	Vanyo	207
8.3.2	VanArsdale	208
8.3.3	Yoder	210
8.3.4	Hartung	210
8.3.5	Singer	213
8.3.6	Conway	217
8.3.7	McKinnon and Mueller	217
8.3.8	Durisen, Gingold, and Scott	218
8.3.9	Boss and Mizuno	220
8.3.10	Mizuno and Boss	220
8.3.11	Cox	221
8.3.12	Hartmann	222
8.4	My Model of Lunar Origin I	223
8.4.1	Malcuit	223
8.4.2	Cassidy	225
8.4.3	Ringwood	226
8.4.4	Binder	231
8.4.5	Wänke and Dreibus	234
8.5	Concluding Remarks	239
	References	239
9	The Kona Conference—Day 3	243
9.1	Introduction	243
9.2	My Model of Lunar Origin—II	243
9.2.1	Greenberg	243
9.2.2	Hartmann	244
9.2.3	Hartmann and Vail	248
9.2.4	Herbert and Davis	251
9.2.5	Weidenschilling	252
9.2.6	Chapman and Greenberg	253
9.2.7	Herbert, Davis, and Weidenschilling	254
9.2.8	Weidenschilling et al.	254
9.2.9	Wasson and Warren	255

9.2.10	Cameron	257
9.2.11	Benz, Slattery, and Cameron	259
9.2.12	Kaula and Beachey	259
9.2.13	Stevenson	262
9.2.14	Melosh and Sonett	264
9.2.15	Kipp and Melosh	266
9.3	Summary and Open Discussion	269
9.4	Concluding Remarks	269
	References	270
10	Assessments	273
10.1	Introduction	273
10.2	Looking Back	273
10.3	Contributing Factors	275
10.3.1	Early Research	275
10.3.2	NASA and the University Research Community	276
10.3.3	Non-U.S. Researchers	277
10.3.4	The Lunar and Planetary Institute	278
10.4	Concluding Remarks	280
	References	280
11	Epilogue	283
11.1	Introduction	283
11.2	Continuing Research Issues	283
11.3	Concluding Remarks	287
	References	287
	Glossary	289
	Index	303
