Acknowledgement	xvii

Part I

Cognitive and learning aspects of drug addiction

1. Executive functioning and substance use disorders

*Bruno Kluwe-Schiavon, Breno Sanvicente-Vieira,
Thiago Wendt Viola, and Ahmed A. Moustafa*

The concept of executive functioning	3
Substance use disorders and executive dysfunction	5
The role of dopamine in executive dysfunction in SUD	8
Action selection, feedback processing and updating	9
SUD, a biopsychosocial executive functioning disorder	12
References	14
Further reading	19

2. Impulsive behavior in drug addiction: Clinical, cognitive, and neural correlates

Yuliya Richard and Ahmed A. Moustafa

Introduction	21
Behavioral definition of impulsivity	24
Functional and dysfunctional impulsivity	26
Impulsivity as a clinical problem	28
Impulsivity in the nonclinical population	30
Impulsivity and cognitive distortions	33
References	35

3. The multifaceted nature of risk-taking in drug addiction

Daniella M. Saleme and Ahmed A. Moustafa

Introduction	41
Risk-taking	42

Dual-systems theory of decision-making	43
Risk-taking in drug addiction and healthy populations	44
Risk-taking and feedback and environmental contingency processing	44
Domain-specific risk-taking	49
Decision-making biases and risk-taking	54
Future studies on risk-taking in drug dependence	57
References	58
 4. Delay, probability, and effort discounting in drug addiction	
<i>Julia Garami and Ahmed A. Moustafa</i>	
Introduction	61
Delay discounting	63
Substance abuse	65
Probability discounting	68
Nicotine	69
Alcohol	70
Illicit drugs	70
Effort discounting	72
Impulsivity	73
Substance abuse	74
Future directions	74
Conclusion	76
References	76
 5. It's all about context: The environment and substance use	
<i>Justin Mahlberg and Ahmed A. Moustafa</i>	
Introduction	85
Environmental stimuli can trigger drug seeking	85
Discrete stimuli can directly trigger drug seeking	86
Relevance of habit formation to addiction	86
Discrete stimuli can indirectly trigger drug seeking	87
Psychological processes in stimulus elicited drug seeking	89
Relevance of the PIT model to addiction	92
Drug and context associations	94
Contexts can trigger drug craving	94
Context can acquire drug-like motivational properties	96
The psychological processes of conditioned place preference	97
Reinstatement effects in the conditioned place preference paradigm	98
Relevance of conditioned place preference to the study of addiction	99
Context can trigger an increase in drug use behavior	100
Psychological processes in context reinstatement	101
Relevance of context reinstatement to drug addiction	102

Summary and conclusion	104
References	105
 6. Avoidance learning and behavior in patients with addiction	
<i>Milen L. Radell, Farahnaz Ghafar, Peter Casbolt, and Ahmed A. Moustafa</i>	
Introduction	113
Avoidance of physical withdrawal	114
Avoidance of negative affect	114
Experiential avoidance	115
Avoidance coping and addiction vulnerability	118
Treatment implications	120
Overgeneral memory as a type of cognitive avoidance	122
Avoidance and reward sensitivity	122
Avoidance in the laboratory	123
Animal research on avoidance	123
Computer-based tasks	126
Limitations and future directions	128
Summary and conclusions	129
References	130
 7. Theories of compulsive drug use: A brief overview of learning and motivation processes	
<i>Lauren M. Foreman, Irina Baetu, Janice Rego, Lyndsey E. Collins-Praino, and Ahmed A. Moustafa</i>	
Introduction	137
An introduction to associative learning and underlying neural circuitry	138
Prediction error theory of compulsive drug use	145
Incentive-sensitization theory of compulsive drug use	150
Goal directed and habitual control	155
Pavlovian-instrumental-transfer	160
Sensitivity to reward and punishment and its association with cognitive control and mood	164
Conclusion	168
References	169
 8. Episodic future thinking in drug addiction	
<i>Alejandro N. Morris, Mohamad El Haj, and Ahmed A. Moustafa</i>	
Introduction	187
Types of future thinking tasks used in the literature	188
Episodic foresight in alcohol dependent populations	189
Addiction	190

Alcohol addiction	190
Episodic future thinking in opiate dependent populations	190
Opiate addiction	192
Episodic foresight in alcohol dependent populations	193
Intolerance to uncertainty scale (IUS) and purpose in life in alcohol and opiate populations	194
Discussion	198
Limitations and future studies	199
References	200
Further reading	202
 9. Intolerance of uncertainty and addiction	
<i>Belinda Favaloro and Ahmed A. Moustafa</i>	
Introduction	205
Intolerance of uncertainty in addiction	205
IU and impulsivity in addiction	207
Intolerance of uncertainty and anxiety	208
IU and contextual cues in addiction	210
IU and working memory in addiction	213
Summary and future research	215
References	216
Further reading	220
 10. Social cognition impairment in different types of drug addictions	
<i>Jean-Louis Nandrino, Mohamad El Haj, and Ahmed A. Moustafa</i>	
Introduction	221
Emotional facial expression (EFE) and substance abuse	222
Theory of mind (ToM) abilities in individuals with SUD	224
Prosody and SUD	229
Conclusion	230
References	231
Further reading	236

Part II

Clinical and treatment aspects of drug addiction

11. Causes and clinical characteristics of drug abuse	
<i>Ahmed A. Moustafa, Julia Garami, Alaa Solieman, Abeer M. Eissa, and Mohamed Shakir</i>	
Introduction	239
Drug addiction	239
Potential causes of drug abuse	240

Methods	241
Subjects	241
Method	241
Results	242
Discussion	245
Gender ratio in drug addiction	245
Peer pressure in drug addiction	246
Psychiatric symptoms associated with drug addiction	247
References	247
 12. Accessing addiction recovery capital via online and offline channels: The role of peer-support and shared experiences of addiction	
<i>Ana-Maria Bliuc, David Best, and Ahmed A. Moustafa</i>	
Introduction	251
Recovery support through belonging to offline pro-recovery groups	253
Online channels of addiction recovery support	255
Conclusion	259
References	261
Further reading	265
 13. The benefits and limitations of methadone: A comparison to other opioid replacement treatments	
<i>Yousif S. Mahdi and Ahmed A. Moustafa</i>	
Introduction	267
Opiate addiction	269
The methadone intervention	270
The benefits of methadone	272
The limitations of methadone	273
Alternative treatments for drug addiction	276
Conclusion	281
References	283
Further reading	287
 14. Motivational interviewing for the treatment of addiction	
<i>Eid Abohamza and Ahmed A. Moustafa</i>	
Introduction	289
Group treatment of substance abuse	289
The motivational enhancement therapy (MET)	290
Five principles of motivational interviewing	293
Practical stages for conducting MET	295
Phase one: Building motivation for change	295
Phase two: Strengthening commitment to change	299

xii Contents

Phase three: Follow-through strategies	301
Stages of change	301
Precontemplation stage	302
Contemplation stage	302
Preparation stage	302
Action stage	303
Maintenance stage	303
The group counseling format	304
Suggested format for motivational groups	305
Group motivational enhancement therapy	306
Providing structure for group MET	306
Conflict and confrontation	307
MET group curriculum	307
Treatment as usual versus MET	307
References	308
