

CONTENTS

ACKNOWLEDGEMENTS	10
INTRODUCTION	12
PART I – RESEARCH CONCEPT	15
1 THEORETICAL IMPLICATIONS	15
1.1 Mobility systems and technological organisation	15
1.1.1 Hunter-gatherers	15
1.1.2 Mobility patterns	15
1.1.3 Technological organisation and operational chains	15
1.1.4 Collectors vs. foragers	16
1.1.5 Curation	17
1.1.6 Occupational duration and palimpsest formation	18
1.1.7 Summary	19
1.2 Contextual areas in Palaeolithic archaeology	19
2 METHODOLOGY	20
2.1 Operational chain reconstruction	20
2.1.1 Raw material analysis	21
2.1.2 Reduction sequences	22
2.1.3 Tool typology	26
2.1.4 Curation	26
2.2 Settlement pattern reconstruction	27
2.2.1 Diversity	27
2.2.2 Working time	28
2.2.3 Faunal consumption	28
2.2.4 Site function	29
PART II – THE WADI SABRA	31
1 RESEARCH HISTORY	31
2 ENVIRONMENTAL RECONSTRUCTION	32
2.1 Geology and geomorphology of the study area	32
2.1.1 Geology	32
2.1.2 Tectonic influence	35
2.1.3 Geomorphology	36
2.2. Climate	39
2.2.1 State of research	39
2.2.2 Climate zones	39
2.2.3 Temperature and precipitation	40
2.2.4 Rapid climate change	41
2.3. Resources available in the Wadi Sabra	43
2.3.1 Hydrology/Water availability	43
2.3.2 Raw material	47
2.3.2.1 Raw material sources	47
2.3.2.2 Raw material types	51
2.3.3 Vegetational resources	57
2.3.4 Faunal biotope	59
3 LANDSCAPE ARCHAEOLOGY	63
3.1 Preservational conditions for sites in the Wadi Sabra	63
3.2 Definition of time slices – archaeological vs. climatic entities	67
4 DATA COLLECTION	67

5 THE SITE OF ANSAB 1 68

5.1 Location of the site 68

5.2 Research history and excavation methods 68

5.3 Sedimentation and geomorphology 69

5.4 Taphonomy and in-situ situation 71

5.5 Hydrology/Water availability 73

5.6 Landscape reconstruction 74

5.6.1 Pollen data and macro remains 74

5.6.2 Fauna 74

5.6.3 Summary: the palaeo-environment of Ansab 75

5.7 Dating 75

5.8 The reconstruction of operational chains and evidence for settlement patterns 75

5.8.1 Choice of the settlement site 75

5.8.2 Raw material procurement strategies 77

5.8.3 Reduction sequences and refits 81

5.8.4 Tool curation 93

5.8.5 Duration of stay 99

5.9 Summary: Mobility and site function in Ansab 101

6 THE PALMVIEW CLUSTER 103

6.1 Location of the Palmview sites in the Wadi Sabra 103

6.2 Individual sites at Palmview, research history and excavation methods 103

6.3 Sedimentation and geomorphology 104

6.4 Taphonomy and in-situ situation 105

6.5 Hydrology/Water availability 106

6.6 Landscape reconstruction 107

6.6.1 Pollen data and macro remains 107

6.6.2 Fauna 107

6.6.3 Summary: the palaeo-environment of the Palmview cluster 108

6.7 Dating 108

6.8 The site of Sabra 4 Palmview 1 109

6.8.1 The reconstruction of operational chains and evidence for settlement patterns 109

6.8.1.1 Choice of the settlement site 109

6.8.1.2 Raw material procurement strategies 110

6.8.1.3 Reduction sequences and refits 113

6.8.1.4 Tool curation 128

6.8.1.5 Duration of stay 139

6.8.2 Summary: Mobility and site function in PV1 139

6.9 The site of Sabra 4 Palmview 3 141

6.9.1 The reconstruction of operational chains and evidence for settlement patterns 141

6.9.1.1 Choice of the settlement site 141

6.9.1.2 Raw material procurement strategies 141

6.9.1.3 Reduction sequences and refits 143

6.9.1.4 Tool curation 148

6.9.1.5 Duration of stay 160

6.9.2 Summary: Mobility and site function in PV3 161

7 THE SABRA 3 CLUSTER (SABRA 3 SOUTH) 163

7.1 Location of the sites 163

7.2 Research history and excavation methods 164

7.3 Sedimentation and geomorphology 164

7.4 Taphonomy and in-situ situation 166

7.5 Hydrology/Water availability 167

7.6 Landscape reconstruction 168

7.6.1 Pollen data and macro remains 168

7.6.2 Fauna 168

7.6.3 Summary: the palaeo-environment at Sabra 3 168

7.7 Dating 169

7.8	The reconstruction of operational chains and evidence for settlement patterns	170
7.8.1	Choice of the settlement site	170
7.8.2	Raw material procurement strategies	170
7.8.3	Reduction sequences and refits	176
7.8.4	Tool curation	182
7.8.5	Duration of stay	183
7.9	Summary: Mobility and site function in S3S	186
8	A LOCAL HYPOTHESIS FOR THE SETTLEMENTS IN THE WADI SABRA	186
9	PLATES	193
PART III – THE WADI SABRA IN THE CONTEXT OF THE LEVANTINE UPPER PALAEOLITHIC		213
1	INTRODUCTION	213
2	HISTORY OF RESEARCH IN THE LEVANT	213
2.1	History of Upper Palaeolithic research in the Levant	213
2.2	Landscape archaeology in the Levant	214
3	DATA COLLECTION	219
4	GEOGRAPHY OF THE LEVANT	220
5	OVERVIEW ABOUT THE CLIMATIC DEVELOPMENT OF THE LEVANT	221
6	PLACEMENT OF THE WADI SABRA SITES IN THE LEVANTINE TYPOLOGY	223
6.1	Current issues in the Levantine typology	223
6.2	Defining time frames	224
7	SITE QUALITY AND PRESERVATION	228
8	LANDSCAPE ARCHAEOLOGY	240
8.1	Spatial distribution	240
8.1.1	Pleistocene surfaces	240
8.1.2	Resources	244
8.1.2.1	Hydrology/Water availability	244
8.1.2.2	Raw material	248
8.2	Preferences of settlement site	251
8.2.1	Importance of environmental parameters	251
8.2.2	Site locality preferences of different cultural groups	254
8.3	Duration of occupation	256
8.3.1	Preservation of reduction sequences	256
8.3.2	Working time	259
8.3.3	Faunal consumption	261
8.4	Diversity	263
8.5	Reduction intensities	266
8.6	Curation	267
8.7	Seasonality	271
8.8	Evaluation of the taphonomic situation	272
8.8.1	General limitations	272
8.9	Modelling of settlement patterns	275
8.9.1	Summary	287
9	SUMMARY: SETTLEMENT PATTERNS AND MOBILITY IN THE LEVANT	287
10	SYNTHESIS	292
11	CONCLUSION AND OUTLOOK	295
