	Kurzfassung.....	I
	Abstract.....	III
	Acknowledgements	IV
1	Introduction.....	1
2	Hazard Probabilistic Safety Analysis	5
2.1	Probabilistic Safety Analysis Models.....	5
2.2	Modelling Hazard Impacts	7
2.2.1	Discretisation of Hazard Impacts in Hazard Compartments	8
2.2.2	Integration of Hazard Impacts	10
2.3	Combination of Hazard Impacts.....	10
3	Automated Integration of Hazard Impacts	13
3.1	Implementation Strategy of pyRiskRobot	13
3.2	Agent-Based Concept of pyRiskRobot.....	15
3.2.1	Generalised Tree Graphs	17
3.2.2	Basic Operations on Fault Trees.....	18
3.2.3	Interactive Operations Across Multiple Fault Trees	20
4	Network-Based Analysis of Hazard Impacts.....	25
4.1	Hazard Compartment Dependencies as Network Graphs.....	26
4.2	Complex Network Graphs.....	27
4.2.1	Network Visualisation	29
4.2.2	Network Analysis	30
4.3	Network Representation of Hazard Impacts on an Exemplary Nuclear Power Plant	32
4.3.1	Analysis of a Plant Internal Fire Hazard	33
4.3.2	Extension to Plant External Hydrological Hazards	36
4.4	Summary and Discussion	37

5 Multidimensional Network Approach for Multiple Hazards 39

5.1 Interpreting Multiple Hazards as Aspects of a Conjoint Network 40

5.2 Multidimensional Network Graphs 41

5.2.1 Types of Multidimensional Networks..... 41

5.2.2 Multiplex Network Representation of Multiple Hazards 42

5.2.3 Benefits for Enhancing Hazards PSA..... 44

5.3 Summary and Discussion 45

6 Conclusions and Outlook 47
