

Table of contents

Preface

Opening Presentation (First Day)

Kent Schölin, Sofia Hedevåg
Carbon footprint study of aluminium brazing sheet 1

Equipment

R. Hodgkinson, J. Jarman, L. Sansby
Skin Test – Helium/Hydrogen Leak Testing by Vacuum Engineering Services /
A theoretical analysis of the Vacuum Technology and related leak detection equipment..... 6

A. Bielewicz, M. Stempniewicz
SECO/WARWICK Active Only CAB furnace - the smart solution for brazing of diverse alu-minum
heat exchangers 8

Applications

Dr. Alexander Rehmer, Dr. Andreas Haas, Dr. Jurgen de Kimpe, Dr. Serge Lievens and Dr. Hans-W. Swidersky
Project Study of Gel Formation in Engine Coolants - and Considerations for the Development
of Further Improved Coolant Compositions 15

M. Ranger
Assessment of Interactions Between Post-Braze Nocolok Flux and Engine Coolant in the Field
and Several Means to Reproduce in the Laboratory 22

Process & Quality Control

H. Zhao, S. Elbel, P. Hrnjak
Impact of substrate surface features on brazing of microchannel heat exchangers 48

A.-G. Villemiane, L. Pasquet, D. Douksouna, J.-S. Lecomte, E. Fleury, C. Schuman
Brazing cycle influence on the brazing joint microstructure and nanohardness –
Behaviour law of the header-joint tube assembly for thermal shock heat exchanger simulation optimization 56

A. Siggel
Development of a partial flux application system to reduce post-braze flux residue 70

D. Davies
Quality Matters-Quality standards are there to be used not abused! 74

Heat Exchanger Products for HVAC&R

R. Beckert, P. Kazanowski, J. Maier
High-Performance Multi-Micro-Port Extruded Tubes 75

A. Große, R. Hermann, U. Wittstadt, B. Nitsch, A. Strehlow
Multifunctional Heat Exchangers for Thermal Energy Storage 83

Opening Presentation (Second Day)

S. Jahn, F. Gemse, M. Matthes
Recent developments in additive manufacturing of metallic materials 90

Materials

T. Suzuki, T. Yamayoshi, Y. Yanagawa
In-situ brazing observation of removal behaviour of oxide film from Al-Si filler surface by
brazing flux 100

V. Saß, G. Bermig, N. Eigen, M. Lentz, M. Mrotzek, C. Wiens
Heat Exchanger Materials for E-Mobility 106

P. Morak, G. Hanko, A. Trier, S. Hainthaler
AMAG TopClad@PURE for improved brazeability 112

Research and Development

M. Türpe, B. Grünenwald, A. Sommer
Contribution on New Results of Investigations of Aluminium Vacuum Brazing 116

L. Wojarski; H. Ulitzka; W. Tillmann; I. J. Rass
Flux-free approaches for brazing aluminum alloys 122

M. Sababi, L. Ahl, D. Abrahamsson
Effect of the flux on the reactivity of cooling systems aluminum alloys with Ethylene Glycol-based Coolants 130

Testing and Design

L. Orman, H. Swidersky
Analysis of Brazing Imperfections by Metallographic Investigation/Optical Microscopy 131

L. Peguet, H. Noui, F. Raffin
A SWAAT procedure based on time to perforation and its use for studying the effect
of metallurgical and process parameters on corrosion resistance of automotive brazing sheets 141

M. Cornejo, F. Ritz, B. Jacoby, S. Kirkham, A. Smeyers
Corrosion in brazed heat exchanger materials: Measurement techniques for optimised
and application specific material designs 147

List of authors 156
