

Contents

Chapter 1. Introduction	1
Chapter 2. Preliminaries	7
2.1. Moufang sets	7
2.2. Rank one groups	10
2.3. Some ring theory	20
2.4. Jordan algebras	21
2.5. Envelopes of special Jordan algebras	25
2.6. Quadratic spaces and Clifford Jordan algebras	28
2.7. Involutory sets and pseudo-quadratic forms	30
2.8. Cubic norm structures	34
2.9. Freudenthal triple systems	35
2.10. Structurable algebras	37
2.11. The Clifford algebra of a Freudenthal triple system	47
Chapter 3. Cubic Action	53
Chapter 4. Examples of cubic modules	59
4.1. Pseudo-quadratic spaces	59
4.2. Adjoint action	60
4.3. The Tits-Kantor-Koecher module	61
4.4. Quadratic pairs without commuting root subgroups	62
4.5. Elementary groups of Freudenthal triple systems	64
4.6. Connection with Moufang Quadrangles	69
4.7. Suzuki and Ree groups	75
Chapter 5. The structure of a cubic module	77
Chapter 6. Construction of irreducible submodules	91
Chapter 7. Cubic rank one groups with trivial quadratic kernel	93
Chapter 8. A characterisation of the adjoint module of $\mathrm{PSL}_2(k)$	101
Chapter 9. Cubic rank one groups with non-trivial quadratic kernel	105
Chapter 10. Cubic rank one groups with Hermitian quadratic kernel	121
Chapter 11. Cubic rank one groups with commutative quadratic kernel	127
Bibliography	139
