

Stefan Riedener

Uncertain Values

An Axiomatic Approach to Axiological Uncertainty

DE GRUYTER

Contents

Acknowledgments — IX

1	The problem of axiological uncertainty — 1
1.1	Introduction — 1
1.2	This book — 5
1.3	Objections — 11
2	The basic argument — 19
2.1	The terminological framework — 19
2.2	Three substantive conditions — 24
2.3	The prospect-explications — 27
2.4	The theorem, the argument and our questions — 32
3	Evaluating the argument — 38
3.1	The Pareto Condition — 38
3.2	vNM-conformability — 41
3.3	The prospect-explications — 47
3.4	Conclusion: decision theory and m^2 -value — 53
4	The problem of intertheoretic comparisons — 56
4.1	Existing proposals — 58
4.2	The Minimal Argument — 68
4.3	Constructivism — 72
4.4	Conclusion: constructivism and EVM — 80
5	The problem of probabilities — 82
5.1	The Representation Theorem for Probabilities — 85
5.2	Applying Subjectivist EVM in practice — 95
5.3	Objections and implications — 98
5.4	Conclusion: Weighted Value Maximisation — 111
6	The problem of incommensurabilities — 113
6.1	Axiomatising incomplete m-value relations — 113
6.2	General moral uncertainty — 120
6.3	Conclusion — 134
A	Appendix — 137
A.1	Proofs for Chapter 2 — 137

XII — Contents

A.2 Proofs for Chapter 5 — **138**

A.3 Proofs for Chapter 6 — **140**

Bibliography — 145

Index Rerum — 153

Index Nominum — 155
