|---------------------------------------------------------------------------------------------------------------------|--------------|
| <b>Contributors</b>                                                                                                 | <b>xvii</b>  |
| <b>Introduction</b>                                                                                                 | <b>xxiii</b> |
| <b>CHAPTER 1</b>                                                                                                    |              |
| <b>Behavioural Finance and Momentum</b>                                                                             | <b>1</b>     |
| 1.1 Introduction                                                                                                    | 1            |
| 1.2 The failure of risk-based explanations                                                                          | 3            |
| 1.3 Behavioural models of momentum                                                                                  | 3            |
| 1.4 Slow information diffusion                                                                                      | 5            |
| 1.5 Patterns in information arrival                                                                                 | 6            |
| 1.6 The 52-week high and capital gains overhang                                                                     | 8            |
| 1.7 Institutional trading and momentum profits                                                                      | 10           |
| 1.8 Sentiment and momentum                                                                                          | 11           |
| 1.9 Discussion                                                                                                      | 12           |
| <b>CHAPTER 2</b>                                                                                                    |              |
| <b>A Taxonomy of Momentum Strategies</b>                                                                            | <b>16</b>    |
| 2.1 Introduction                                                                                                    | 16           |
| 2.2 Relative strength strategies                                                                                    | 17           |
| 2.3 Time-series momentum strategies                                                                                 | 18           |
| 2.4 Cross-sectional momentum strategies                                                                             | 20           |
| 2.5 Cross-asset momentum                                                                                            | 27           |
| <b>CHAPTER 3</b>                                                                                                    |              |
| <b>Demystifying Time-Series Momentum Strategies: Volatility Estimators, Trading Rules and Pairwise Correlations</b> | <b>30</b>    |
| 3.1 Data Description                                                                                                | 34           |
| 3.2 Methodology                                                                                                     | 39           |
| 3.3 Turnover Reduction                                                                                              | 42           |
| 3.4 The Recent Underperformance of Time-series Momentum Strategies and the Effect of Pairwise Correlations          | 52           |
| 3.5 Trading Costs Implications                                                                                      | 58           |
| 3.6 Concluding Remarks                                                                                              | 63           |

**CHAPTER 4****Risk and Return of Momentum in Developed Equity Markets 68**

|     |                                         |    |
|-----|-----------------------------------------|----|
| 4.1 | Introduction                            | 68 |
| 4.2 | Definition of momentum                  | 69 |
| 4.3 | Simple factor portfolios                | 71 |
| 4.4 | Multifactor structure                   | 73 |
| 4.5 | Pure factor portfolios                  | 75 |
| 4.6 | Empirical results: momentum performance | 76 |
| 4.7 | Empirical results: momentum risk        | 80 |
| 4.8 | Diversification benefits                | 83 |
| 4.9 | Summary                                 | 84 |

**CHAPTER 5****Momentum Across Asset Classes 86**

|      |                                                      |    |
|------|------------------------------------------------------|----|
| 5.1  | Measuring momentum                                   | 87 |
| 5.2  | Framework: equity momentum and corporate credit risk | 87 |
| 5.3  | Empirical studies: momentum and credit risk          | 89 |
| 5.4  | Our research on equity momentum and bond returns     | 91 |
| 5.5  | Geographically bound assets                          | 92 |
| 5.6  | Momentum in other illiquid assets                    | 94 |
| 5.7  | Cross-asset class effects of commodities             | 95 |
| 5.8  | Momentum effects and taxable investors               | 95 |
| 5.9  | Active management and momentum effects               | 96 |
| 5.10 | Conclusions                                          | 98 |

**CHAPTER 6****Momentum in Momentum ETFs 103**

|     |                                                    |     |
|-----|----------------------------------------------------|-----|
| 6.1 | Introduction                                       | 103 |
| 6.2 | Why are momentum ETFs so popular?                  | 104 |
| 6.3 | What is in a momentum ETF?                         | 112 |
| 6.4 | Which factors drive active risk for momentum ETFs? | 114 |
| 6.5 | From constrained to unconstrained strategies       | 117 |
| 6.6 | Conclusions                                        | 119 |

**CHAPTER 7****CTA Momentum 120**

|       |                                                |     |
|-------|------------------------------------------------|-----|
| 7.1   | Introduction                                   | 120 |
| 7.2   | Time-series momentum (TSM)                     | 121 |
| 7.3   | Strategy return models                         | 127 |
| 7.4   | Time-series momentum                           | 131 |
| 7.5   | TSM meets CSM with two instruments             | 133 |
| 7.6   | Conclusions                                    | 135 |
| 7.A.1 | Appendix A: Correlation parameter restrictions | 136 |
| 7.A.2 | Appendix B: Proofs of variances and covariance | 138 |

**CHAPTER 8**

|                                                                                |            |
|--------------------------------------------------------------------------------|------------|
| <b>Overreaction and Faint Praise – Short-Term Momentum in Contemporary Art</b> | <b>141</b> |
| 8.1 Introduction                                                               | 141        |
| 8.2 Contemporary art market ecosystem                                          | 144        |
| 8.3 ArtForecaster data                                                         | 145        |
| 8.4 Systematic forecasting strategies                                          | 149        |
| 8.5 Conclusions                                                                | 157        |

**CHAPTER 9**

|                                               |            |
|-----------------------------------------------|------------|
| <b>Volatility-Managed Momentum</b>            | <b>160</b> |
| 9.1 Introduction                              | 160        |
| 9.2 Data and momentum portfolio construction  | 161        |
| 9.3 Volatility-managed momentum strategies    | 162        |
| 9.4 Some potential practical issues           | 166        |
| 9.5 The best volatility measure for momentum? | 170        |
| 9.6 Concluding remarks                        | 172        |

**CHAPTER 10**

|                                                           |            |
|-----------------------------------------------------------|------------|
| <b>Theoretical Analysis of the Fama-French Portfolios</b> | <b>174</b> |
| 10.1 Introduction                                         | 174        |
| 10.2 Strategies, notation and preliminaries               | 179        |
| 10.3 Distribution of Fama-French factors                  | 182        |
| 10.4 Fama-French factors with sequential sorting          | 189        |
| 10.5 Conclusion                                           | 194        |
| 10.A.1 Proof of Lemma 1                                   | 194        |
| 10.A.2 Proof of Theorem 3                                 | 195        |
| 10.A.3 Proof of Theorem 4                                 | 196        |

**CHAPTER 11**

|                                                                                                                    |            |
|--------------------------------------------------------------------------------------------------------------------|------------|
| <b>Exploiting the Countercyclical Properties of Momentum and other Factor Premia – A Cross-Country Perspective</b> | <b>199</b> |
| 11.1 Introduction                                                                                                  | 199        |
| 11.2 Methodology                                                                                                   | 200        |
| 11.3 Alternative investment strategies                                                                             | 206        |
| 11.4 Quantifying the utility of risk premia strategies                                                             | 211        |
| 11.5 Summary and conclusions                                                                                       | 215        |

**CHAPTER 12**

|                                                                                    |            |
|------------------------------------------------------------------------------------|------------|
| <b>Time-Series Variation in Factor Premia: The Influence of the Business Cycle</b> | <b>218</b> |
| 12.1 Introduction                                                                  | 218        |
