

Contents

I	Introduction	1
1	Interstellar medium and the formation of stars	3
1.1	Interstellar medium (ISM) in the Milky Way	3
1.1.1	Diffuse Clouds	4
1.1.2	Molecular clouds	4
1.2	Star formation	4
1.2.1	Low-mass Star formation	4
1.2.2	High-mass star formation	5
1.3	Chemistry in ISM	6
1.4	Sulfur-bearing molecules in ISM	7
1.4.1	Cosmic rays	8
2	Sagittarius B2	11
2.1	Physical structure of Sagittarius B2	11
2.2	ALMA observations	13
3	Goals and outline of the thesis	17
II	Methods	19
4	Deriving molecular column densities	21
4.1	Deriving molecular column densities by using rotational diagrams	22
4.2	Using XCLASS to determine the column density and temperature of molecules	23
5	Saptarsy - the astrochemical model	27
5.1	Saptarsy	27
5.1.1	Reaction rate approach	27
5.1.2	Gas-phase reactions in the simulation	28
5.1.3	Grain-phase reactions in the simulation	29
5.1.4	The multilayer approach for simulating dust grain chemistry.	31
5.1.5	Chemical Model	31
5.2	The Physical Model	33
5.2.1	Density and thermal evolution of molecular cloud	35

III	Observational results	41
6	Sagittarius B2 Main	43
6.1	Physical structure	43
6.2	Chemical structure	46
6.2.1	Temperature distribution in Sgr B2 (Main)	48
6.2.2	Column density distribution of the molecular cloud	50
6.2.3	Comparion of molecules depend on the temperature	55
IV	Astrochemistry modeling of Sgr B2 (Main)	57
7	Astrochemistry models	59
7.1	Motivation	59
7.1.1	Cosmic rays ionization rate	60
7.1.2	Changing the cloud's density distribution	60
7.1.3	Influence of thermal evolution	61
7.1.4	Desorption energy of SO and OCS molecules	61
7.2	The reference model	61
7.3	Evolution of molecule abundances in molecular cloud	63
7.4	Total reaction rate	64
8	Chemical Model Results and Analysis	67
8.1	The impact of cosmic rays in S-bearing molecules	67
8.2	Influence of cosmic rays on the chemistry of S-bearing molecules	68
8.2.1	Cold collapse	69
8.2.2	Warm-up phase	70
8.3	Influence of density	72
8.4	Influence of density distribution of the molecular cloud	74
8.5	Influence of thermal evolution of cloud	76
8.6	Influence of binding energy E_D of SO and OCS	79
9	Comparison of the observed and model results	83
9.1	Calculation of the ratio of S-bearing molecules	84
9.1.1	Computing the column density ratio of S-bearing molecules in ob- served results	84
9.1.2	Computing the abundances ratio of S-bearing molecules in astro- chemical models	84
9.2	Comparison observed and simulation results	84
9.2.1	Comparison of the ratio of SO ₂ and SO molecules	85
9.2.2	Comparison of the ratio of SO ₂ and OCS molecules	87
10	Discussion	91
V	Conclusion and Outlook	95
11	Conclusion	97
12	Outlook	99

Bibliography	103
Acknowledgement	109
Erklärung	111
Appendix A Astrochemistry models	115
A.1 The impact of cosmic rays in S-bearing molecules	115
A.2 Influence of density	123
A.3 Influence of density distribution of the molecular cloud	127
A.4 Influence of thermal evolution of the cloud	130
Appendix B Comparision data vs astrochemical model	133
B.1 CS vs SO ₂	133
B.2 H ₂ CS vs SO ₂	135
B.3 H ₂ S vs SO ₂	138
