

CONTENTS

I. Introduction	7
1 Target requirements	8
2 Instrument requirements	9

II. Target Stations	13
1 Neutron target	13
1.1 Target requirements and engineering design	13
1.2 Target cooling	16
1.3 Computational design and verification	17
1.4 Experimental Validation	22
1.5 Neutronics	24
1.6 Radiation damage and target lifetime	25
1.7 Target manufacturing, installation and handling	27
1.8 Target activation	30
2 Target support systems	35
2.1 Target plug and target vacuum housing	35
3 Target handling	41
3.1 Target handling tool	41
3.2 Target transport	43
3.3 Target storage	44
4 Thermal Moderator and Reflector	46
4.1 Position and geometry of TMR	47
4.2 Materials	48
4.3 Radiation heating, cooling requirements	48
4.4 Design concept of the thermal moderator	49
4.5 Design concept of the reflector	51
5 Cryogenic moderators	54
5.1 Moderator materials	54
5.2 Cryostat designs	55
5.3 Operation, control, sensors	62
5.4 Radiative heating, cooling requirements	63
6 Shielding and neutron extraction	65
6.1 Construction and Manufacturing	65
6.2 Neutron extraction plugs	67

6.3	Beam shutters	69
6.4	Target station bunker	71
6.5	Target station prototyping	72
6.6	Shielding activation	72
6.7	Shielding dose rates	73
7	Target station control and operation	75
7.1	Target area access mechanism	77
7.2	Target handling system	78
7.3	Target cooling system	78
7.4	Target vacuum system	80
7.5	Cryogenic moderators	80
7.6	Target station integration into the MPS	81
8	Commissioning and decommissioning of TMR and targets	81

III.	Nucleonics	83
1	Neutron yield	83
2	Neutron time structure	84
3	Neutron spectra	85
4	Neutron source comparison	86

IV.	Infrastructure and buildings	89
1	General layout	89
2	Buildings and construction	91
3	Costing and Timeline	91

V.	Author list and acknowledgements	93
1	Volume author list	93
2	Acknowledgments	93

A.	Appendices	95
1	Shielding for the HBS-type target station of the JULIC Neutron Platform	95
2	Technical drawing of the neutron target assembly	101
3	Schematic of the liquid para-hydrogen moderator cryostat	105
4	Technical drawings of the L-tube from the HBS target station prototype	106
5	Neutron time structure	108

B.	References	109
