FOREWORD	v
CHAPTER	
I. ROLE OF PROTEINS IN BIOLOGY.	1
II. ISOLATION, PURIFICATION, AND DETERMINATION OF PROTEINS	3
A. Methods of Isolation.	3
B. Fractionation of Protein Mixtures	8
C. Criteria for the Purity of Proteins	9
D. Color Reactions of Proteins	10
E. Irreversible Precipitation of Proteins	11
F. Quantitative Determination of Proteins.	12
References	14
III. HYDROLYTIC CLEAVAGE OF PROTEINS	16
A. Methods of Hydrolysis	16
B. Determination of Rate of Hydrolysis.	17
C. Fractionation and Isolation of Amino Acids and Peptides.	20
D. Determination of Amino Acids in Proteins and in Protein Hydrolyzates	22
E. Amino Acid Composition of Proteins.	31
F. Order of Amino Acids in the Peptide Chain	33
References	34
IV. SIZE AND SHAPE OF PROTEIN MOLECULES.	38
A. General Remarks.	38
B. Osmotic Pressure of Proteins	39
C. Sedimentation Equilibrium	42
D. Diffusion Rate of Proteins.	43
E. Sedimentation Velocity of Proteins.	45
F. Flow Birefringence.	47
G. Viscosity of Protein Solutions	47
H. Light Scattering by Proteins.	51
I. X-Ray Analysis of Soluble Proteins.	52
J. Electron Micrography of Proteins	53
K. Comparison of Molecular Weights Found by Different Methods	53
References	55
V. ELECTROCHEMISTRY OF PROTEINS.	58
A. Amino Acids as Dipolar Ions	58
B. Ionization of Proteins. Combination with Hydrogen Ions	66
C. Combination of Proteins with Other Ions	73
D. Electrophoresis of Proteins	75
References	83
VI. INTERACTION OF PROTEINS WITH WATER.	86
A. Hydration.	86
B. Hydration of Dry Protein.	90

X	CONTENTS	
CHAPTER		Page
C.	Hydration of Proteins in Solution	93
D.	Immobilized Water	95
E.	Solubility of Proteins in Water	96
F.	Proteins in Surfaces and Interfaces	99
	References	102
VII.	INTERNAL STRUCTURE OF GLOBULAR PROTEINS.	104
A.	General Considerations	104
B.	End Groups of Peptide Chains	105
C.	Substitution of Terminal Amino Groups	107
D.	Terminal α -Carboxyl Groups	109
E.	Substitution of Other Groups	110
F.	Ring Structures in Proteins	112
G.	Branching (Ramification) in Peptide Chains	114
H.	Order of Amino Acids in Peptide Chains	115
I.	Salt Linkages and Hydrogen Bonds in Proteins	116
J.	Optical Properties of Proteins	118
K.	Dielectric Constant of Protein Solutions	121
L.	Denaturation of Proteins	125
M.	Summary	141
	References	142
VIII.	ALBUMINS, GLOBULINS, AND OTHER SOLUBLE PROTEINS.	148
A.	Classification of Soluble Proteins	148
B.	Proteins of Blood Serum	148
C.	Fibrinogen and Fibrin	156
D.	Muscle Proteins (Contractile Proteins)	160
E.	Other Albumins and Globulins of Animal Origin	166
F.	Vegetable Proteins	167
G.	Protamines and Histones	169
	References	170
IX.	INSOLUBLE PROTEINS (Scleroproteins)	175
A.	General Remarks	175
B.	Keratins	175
C.	Fibroin and Other Keratinlike Proteins	179
D.	Collagen and Gelatin	180
E.	Elastin	182
F.	Polyglutamic Acid	182
G.	Biological Importance of Structural Proteins	183
	References	184
X.	COMBINATION OF PROTEINS WITH OTHER SUBSTANCES.	186
A.	Intermolecular Forces	186
B.	Protein-Nonprotein Compounds	188
	References	193
XI.	CONJUGATED PROTEINS	194
A.	Lipoproteins	194
B.	Glucoproteins (Mucoproteins)	198

CHAPTER	Page
C. Phosphoproteins	202
D. Metalloproteins	204
E. Hemoglobin	206
F. Combination of Proteins with Porphyrins and Bile Pigments	218
G. Nucleoproteins	219
H. Melanins	225
References	226
XII. PROTEINS WITH ENZYMATIC PROPERTIES	233
A. The Function of Proteins as Enzymes and Apoenzymes	233
B. Physicochemical Properties of Enzymes	234
C. Function of Apoenzymes	236
D. Specificity of Enzymes	236
E. The Enzyme-Substrate Complex	238
F. Kinetics of Enzyme Reactions	240
G. Mechanism of Enzymatic Hydrolysis	243
H. Hydrolases	247
I. Catalysis of Oxidoreductions by Enzymes	250
J. Enzymes Containing Iron or Copper	252
K. Flavoproteins and Pyridine Nucleotides	256
L. Other Enzymes	259
M. Summary	260
References	261
XIII. PROTEINS WITH HORMONE ACTIVITY	266
A. General Remarks	266
B. Thyroid Hormone (Thyroglobulin)	267
C. Insulin	268
D. Hormones of the Posterior Pituitary Lobe	271
E. Hormones of the Anterior Pituitary Lobe	272
F. Other Protein Hormones	275
G. Action of Protein Hormones	276
References	276
XIV. ROLE OF PROTEINS IN IMMUNOLOGICAL REACTIONS	280
A. Antigens	280
B. Antibodies	284
C. Combination of Antigens with Antibodies	291
D. Complement	295
E. Other Immunological Phenomena	297
References	298
XV. TOXINS (TOXIC PROTEINS)	302
A. General Remarks	302
B. Bacterial Toxins	302
C. Other Toxins	304
References	305
XVI. THE SUPPLY OF AMINO ACIDS FOR PROTEIN BIOSYNTHESIS	307
A. Enzymatic Hydrolysis of Proteins	307
B. Protein Supply by the Food. Essential and Nonessential Amino Acids	313

CHAPTER	Page
C. Endogenous Formation of Nonessential Amino Acids.	316
D. Essential Amino Acids	321
References	323
XVII. PROTEIN SYNTHESIS.	326
A. Polymerization of Amino Acids in Vitro.	326
B. Peptide Synthesis by Enzymes.	327
C. Rate of Protein Synthesis in the Living Organism	329
D. Nucleic Acids and Protein Synthesis	333
E. Structural Protein Units in the Cell	336
F. Virus Particles.	337
G. Mechanism of Protein Synthesis.	340
References	355
Index	359
