

Table of contents

Acknowledgement.....	I
Abstract.....	III
Zusammenfassung.....	V
Table of contents.....	VII
1 Introduction	1
1.1 The code d ³ f++	2
1.2 Basic equations of d ³ f++	2
2 Flow and transport in fractured media.....	5
2.1 Introduction	5
2.2 Isothermal 3D-flow at the BRIE-site	7
2.2.1 Task 8c.....	7
2.2.2 Task 8d	20
2.3 Isothermal 3D-flow at the Prototype Repository.....	36
2.4 Non-isothermal 3D-flow at the Prototype Repository	59
2.4.1 Pure heat flow model	59
2.4.2 Thermo-hydraulic flow model	68
3 Heat flow – Borden field research site	79
3.1 Introduction	79
3.2 The Model Description	80
3.3 The Model Domain and Boundary Conditions	81
3.4 Initial Conditions and Model Parameters	82
3.5 Numerical Results	83
3.5.1 Free surface of water	84
3.5.2 Flow and Heat transport.....	85
3.5.3 Convergence Test of the Simulations in 3D.....	86
3.5.5 Improved Point Source in 3d Models	89
3.5.6 Improved Line Source in 3d Models.....	90

3.5.7	Influence of the Heat Transfer Factor	92
3.6	Discussion.....	98
4	Laboratory experiment: Freshwater lens below an island	101
4.1	Laboratory experiment	101
4.2	Benchmark definition.....	102
4.3	Numerical model	105
4.4	Summary	109
5	Density-driven flow with free groundwater surface – the WIPP-Site model.....	111
5.1	Hydrogeological situation	112
5.2	Model description	115
5.3	Numerical model	117
5.4	Results	119
5.5	Summary	121
6	Reactive transport.....	123
6.1	Model setup.....	123
6.2	Results	126
7	Summary and conclusions	127
8	References.....	131
	Table of figures.....	139
	List of tables.....	145
