1	Abstract	5
2	Summary	5
3	Introduction	7
4	Scope	7
5	Model development	7
5.1	Database	7
5.1.1	Exposure studies	7
5.1.2	Sampling methodology	11
5.1.3	Data entry	11
5.1.4	Quality control	11
5.1.5	Exposure data	11
5.1.6	Data processing	12
5.1.7	Exposure scenarios	13
5.2	Statistical evaluation	13
5.2.1	Variables	13
5.2.2	Form of the model	14
5.2.3	Choice of factors	14
5.2.4	Choice of exposure reference value and summation of percentiles	14
5.2.5	Methods	14
5.2.6	Results	15
5.3	Validation	20
5.3.1	Robustness analysis through cross validation	20
5.3.2	Prediction capability	22
6	Predictive exposure model	25
6.1	Model	25
6.1.1	Calculation	25
6.1.2	Applicability domain	26
6.1.3	Work clothes and personal protective equipment	27
6.1.4	Tiered approach	29
6.2	Operator exposure calculator	29
6.3	Data gaps	29
6.4	Future perspectives	29
7	Conclusions	29
8	Supplementary information	29
9	References	29

10	Abbreviations	30
Appendix 1	Study descriptions	31
Appendix 2	Model predictions (75th percentile)	42
Appendix 3	Estimations of the 75th percentile	45
Appendix 4	Model predictions (95th percentile)	49
Appendix 5	Estimations of the 95th percentile	52
11	List of Figures	105
12	List of Tables	107
