

Table of content

| | |
|---|-----------|
| Acknowledgements | I |
| Abstract..... | II |
| 1 Introduction..... | 1 |
| 1.1 The GWFTS Task Force | 1 |
| 1.2 Background..... | 2 |
| 1.2.1 Early work on the skin effect in wellbores..... | 2 |
| 1.2.2 Skin effect in deep mines in crystalline rock | 4 |
| 1.3 Report structure | 4 |
| 2 Flow skin processes..... | 7 |
| 2.1 Observations..... | 7 |
| 2.1.1 Borehole scale | 7 |
| 2.1.2 Tunnel scale | 11 |
| 2.1.3 Repository scale | 19 |
| 2.2 Potential processes and features | 20 |
| 2.2.1 Mechanical fracture closure | 20 |
| 2.2.2 Degassing..... | 22 |
| 2.2.3 Turbulent flow in channels | 22 |
| 2.2.4 Clogging..... | 22 |
| 2.2.5 Scale dependence and connectivity | 23 |
| 2.2.6 Process and feature interactions..... | 23 |
| 3 Transport skin observations | 25 |
| 3.1 Observations..... | 25 |
| 3.1.1 Observations in the laboratory | 27 |
| 3.1.2 Observations in the field..... | 31 |
| 3.2 Potential processes and features | 36 |
| 3.2.1 Porosity distribution..... | 37 |
| 3.2.2 Inhomogeneity of the rock | 37 |
| 3.2.3 Degassing..... | 37 |
| 3.2.4 Advection opposing diffusion..... | 38 |
| 3.2.5 Borehole disturbed zone | 38 |

| | | |
|-------------------------|--|-----------|
| 3.2.6 | Rock desaturation | 38 |
| 3.2.7 | Mechanical stress redistribution after excavation/drilling | 38 |
| 3.2.8 | Excavation induced structural changes | 39 |
| 3.2.9 | Clogging..... | 41 |
| 3.2.10 | Post-test artefacts | 42 |
| 3.3 | "Skin-effect" depths | 43 |
| 4 | Conclusions and recommendations..... | 45 |
| 4.1 | Summary | 45 |
| 4.1.1 | Flow | 45 |
| 4.1.2 | Transport | 46 |
| 4.1.3 | Relevance to repository performance..... | 47 |
| 4.1.4 | Tabular summary of processes | 47 |
| 4.2 | Conclusions | 50 |
| 4.2.1 | Relevance to site characterisation..... | 52 |
| 4.2.2 | Relevance to performance assessment | 52 |
| 4.3 | Recommendations | 52 |
| References | | 55 |
