

Table of Contents

Abbreviations.....	4
1. Introduction.....	5
1.1. A Brief Overview of Schizophrenia.....	5
1.2. Cognitive deficits in schizophrenia.....	7
1.3. Auditory evoked potentials, double-click paradigm and sensory deficits in schizophrenia.....	8
1.4. Hypothetical relationship between cognitive deficits and auditory information processing in schizophrenia.....	11
1.5. Objectives.....	14
2. Methods.....	15
2.1. Study description and study sample.....	15
2.2. Neuropsychological testing.....	16
2.3. Auditory evoked potentials.....	19
2.3.1. EEG recordings.....	19
2.3.2. EEG processing and analysis.....	20
2.4. Statistical analyses.....	23
2.5. Antipsychotic medication.....	23
3. Results.....	24
3.1. Descriptive statistics.....	24
3.1.1. Sociodemographic and clinical characteristics.....	24
3.1.2. Neuropsychological performance.....	24
3.1.3. Auditory ERPs and sensory gating.....	26
3.2. Correlation analyses.....	32
3.2.1. Correlation of P50, N100, P200 amplitudes with neuropsychological test scores.....	32
3.2.2. Correlation of P50, N100, P200 gating with neuropsychological test scores.....	32
3.2.3. Correlation with antipsychotic medication.....	36
3.2.4. Regression analyses.....	36
4. Discussion.....	37
5. Summary.....	48
6. Summary in German (Zusammenfassung in deutscher Sprache).....	49
7. References.....	50
8. Personal Publications.....	66
Acknowledgments.....	67
Eidesstattliche Erklärung.....	68
