

List of Contents

1. List of Tables.....	1
2. List of Figures.....	2
3. Abbreviations.....	3
4. Introduction.....	6
4.1 Epidemiology and biology of pancreatic cancer	6
4.2 Silver nanoparticles	7
4.2.1 Synthesis of AgNPs.....	8
4.2.2 Antimicrobial activity of AgNPs.....	9
4.2.3 AgNPs are promising for elimination of many cancer entities	11
4.2.4 Side effects of AgNPs	14
4.2.5 Systematic distribution and deposition of AgNPs in the body	15
4.2.6 ROS are major factors for AgNP-induced cytotoxicity	16
4.3 α-Lipoic acid.....	16
4.3.1 α -Lipoic acid acts antioxidative	18
4.3.2 α -Lipoic acid is used for treatment of metal intoxication	19
4.3.3 α -Lipoic acid is used in experimental cancer therapy	20
5. Aims of the present study	22
6. Materials and Methods.....	23
6.1 Materials	23
6.1.1 Equipment and consumables.....	23
6.1.2 Media, supplements and reagents for cell culture.....	24
6.1.3 Chemicals, kits, and cytotoxic agents	25
6.1.4 Buffers and solutions	26
6.1.5 Antibodies	28
6.2 Methods.....	28
6.2.1 Cell culture.....	28
6.2.2 Reagents	30
6.2.3 AgNPs synthesis.....	30
6.2.4 Cell viability assay	31
6.2.5 Determination of silver ion concentration	31
6.2.6 Quantification of the total silver concentration by inductively coupled plasma - optical emission spectrometry.....	32
6.2.7 Transmission electron microscopy (TEM).....	33
6.2.8 Measurement of <i>E. coli</i> growth.....	34
6.2.9 Fluorescence-activated cell sorter analysis (FACS).....	34
6.2.10 Staining of mitochondria.....	36
6.2.11 mRNA microarray profiling.....	37
6.2.12 Gene set enrichment analysis (GSEA).....	37
6.2.13 Protein isolation and Western blot analysis	38
6.2.14 Evaluation of growth and liver morphology of chick embryos	42

6.2.15 Tumor xenotransplantation of the CAM of fertilized chicken eggs	43
6.2.16 Statistical analysis	44
7. Results	45
7.1 Synthesis and characterization of AgNPs	45
7.2 High AgNP concentrations are liver toxic and inhibit embryonal development	49
7.3 α-Lipoic acid protects nonmalignant cells but not PDAC cells from AgNP-induced cytotoxicity	51
7.4 α-Lipoic acid inhibits AgNP-induced mitochondrial damage and ROS formation	55
7.5 α-Lipoic acid reduces AgNP-induced cell death	59
7.6 α-Lipoic acid precipitates silver particles and ions	61
7.7 α-Lipoic acid prevents AgNP-induced side effects <i>in vivo</i>, while not affecting the therapeutic efficacy of AgNPs on tumor growth.....	64
7.8 AgNPs inhibit BCAT1 expression, which is rescued by α-lipoic acid	68
8. Discussion.....	71
8.1 Generation of AgNPs, detection of the silver concentration and toxicity in <i>E. coli</i>.....	71
8.2 AgNPs selectively target malignant cells.....	72
8.3 α-Lipoic acid prevents AgNP-induced side effects without reducing its cytotoxicity to PDAC cells	74
8.4 α-Lipoic acid chelates AgNPs and Ag^+, and thereby limits their cytotoxicity	76
8.5 Suitability of the chicken egg xenotransplantation model for <i>in vivo</i> analysis	76
8.6 Strengths and limitations of this study.....	77
9. Conclusion	79
10. Summary.....	80
11. References	84
12. Own Publications	103
13. Curriculum Vitae	104
14. Acknowledgment.....	105
15. Eidesstattliche Versicherung.....	106
