

## Table of contents

1	Preface .....	1
2	<b>Ion mobility in potentiometric methods .....</b>	<b>5</b>
2.1	Diffusion potential .....	5
2.2	Ion mobility: Classical measuring methods .....	7
3	<b>Electrochemical impedance spectroscopy (EIS): Design of an electrodynamic method.....</b>	<b>11</b>
3.1	Fundamentals.....	11
3.2	Experimental details .....	16
3.2.1	Electrolyte solutions.....	16
3.2.2	Measuring device.....	16
3.2.3	Electrical characterization of the measuring cell.....	18
3.3	Electrodynamic models: a literature survey.....	20
3.4	Theoretical description of concentrated electrolytes.....	26
3.4.1	Fundamental concepts of transport in concentrated solutions.....	26
3.4.2	Transport behavior of two mobile charges .....	28
3.5	Contrasting the theoretical description with experiments.....	35
3.6	Method of analysis and results.....	40
4	<b>Time-Domain-Reflectometry method.....</b>	<b>43</b>
4.1	TDR sensors.....	44
4.2	Experimental details .....	47
4.3	Data analysis .....	51
4.4	Results .....	55
5	<b>The Redox behavior of the U(IV)/U(VI) system .....</b>	<b>59</b>
5.1	Experimental details .....	61
5.2	Electrochemical studies .....	63

5.3	Redox experiments.....	72
5.4	Spectroscopic measurements.....	78
<b>6</b>	<b>Conclusions and Outlook.....</b>	<b>83</b>
	<b>References .....</b>	<b>91</b>
<b>A</b>	<b>Experimental impedance data for solutions of CsCl and salts of the oceanic system at 25 °C: cell length: 27.3 cm, amplitude ΔV: 100 mV.....</b>	<b>97</b>
<b>B</b>	<b>Guide for performing time-to-frequency domain Fourier transformation of TDR data using Origin ® software.....</b>	<b>195</b>
	<b>List of figures .....</b>	<b>201</b>
	<b>List of tables .....</b>	<b>207</b>
