

Table of Contents

List of Abbreviations	
1 Introduction	1
1.1 Chronic kidney disease	1
1.2 Renal fibrosis in CKD	1
1.2.1 Definition of renal fibrosis	1
1.2.2 Myofibroblast as the cellular source of ECM	3
1.3 TGF- β as the master regulator of renal fibrosis	3
1.3.1 TGF- β signaling	4
1.3.2 Inhibition of TGF- β in clinical trials	5
1.4 Other signaling pathways in renal fibrosis	7
1.4.1 The Jagged1/Notch signaling pathway	7
1.4.2 The Wnt/ β -catenin signaling pathway	8
1.4.3 The Hedgehog/Gli signaling pathway	8
1.4.4 Inflammation	9
1.4.5 Oxidative stress	10
1.5 <i>In vitro</i> models of myofibroblast differentiation	10
2 Research objective	13
3 Materials and methods	14
3.1 Materials.....	14
3.1.1 Table 1: Materials for cell culture and stimulation	14
3.1.2 Table 2: General materials and reagents for all the experiment .	14
3.1.3 Table 3: Immunofluorescence antibodies	15
3.1.4 Table 4: Real-time PCR primers	15
3.1.5 Table 5: Equipment	16
3.2 Methods	17
3.2.1 Cell lines.....	17
3.2.2 Cell culture.....	18
3.2.3 Fibrosis models stimulation <i>in vitro</i>	18
3.2.3.1 TGF- β stimulation	18
3.2.3.2 Poly(I:C) stimulation	18
3.2.3.3 IL-1 β stimulation	19

3.2.3.4	Mechanical stress stimulation	19
3.2.3.5	Sheer stress stimulation	19
3.2.3.6	Tunicamycin stimulation	20
3.2.3.7	Hypoxia stimulation	20
3.2.3.8	Cisplatin and aristolochic acid stimulation	21
3.2.4	Fluorescence-activated cell sorting (FACS).....	23
3.2.5	RNA isolation, purification and cDNA transcription	23
3.2.6	Real-Time Quantitative PCR	24
3.2.7	Immunofluorescence staining	24
3.2.8	Statistical analyses	25
4	Results.....	26
4.1	TGF- β is the primary factor that regulates fibrosis in renal fibroblasts .	26
4.2	Poly(I:C)-induced activation of immortalized PDGFRB ⁺ cells	28
4.3	Interleukin-1 beta (IL-1 β) stimulation of immortalized human PDGFRB ⁺ cells	31
4.4	Mechanical stress activation of immortalized PDGFRB ⁺ cells	33
4.5	Analysis of the effect of shear stress (SS) immortalized human PDGFRB ⁺ cells <i>in vitro</i>	36
4.6	Effect of endoplasmic reticulum (ER) stress on immortalized human PDGFRB ⁺ cells	38
4.7	Analysis of the effect of hypoxia signaling on fibroblast activation and myofibroblast differentiation	40
4.8	Analysis of cisplatin-induced renal toxicity in an <i>in vitro</i> co-culture model of immortalized renal tubular CD10 ⁺ cells and mesenchymal PDGFRB ⁺ cells	45
4.9	Modeling aristolochic acid nephropathy in a co-culture system of immortalized tubular CD10 ⁺ cells and mesenchymal PDGFRB ⁺ cells	50
5	Discussion.....	53
5.1	Inflammation in renal fibrosis	53
5.2	Mechanical stress in renal fibrosis	55
5.3	Hypoxia in renal fibrosis	57
5.4	Toxicity in renal fibrosis	58
5.5	Limitation of the tested <i>in vitro</i> models	60
6	Summary.....	62
7	References.....	63

8 Appendix.....	76
8.1 List of own publications	76
8.2 Acknowledgements	77
8.3 Affidavit according to § 5 (1) for Data Retention	78
8.4 Affidavit according to § 5 (1) § 11 (3) 12 of the doctoral studies regulations	79
8.5 Curriculum Vitae	80
