

Content

	Introduction.....	I
	Content.....	III
1	Agenda	1
2	Titles of the Lectures of the Authors.....	3
2.1	Current and future GRS Dry Storage Research Activities	5
2.2	IAEA Activities related to Extended Storage of Fuel.....	6
2.3	Finding Critical Rods for Dry Storage Analyses	7
2.4	Extended Storage of Spent Nuclear Fuel in Casks -Inventory Assessment using Fuel Rod Performance Codes	8
2.5	Evaluating Spent Fuel Safety in Transportation/ Handling Accidents - A Statistical Approach	9
2.6	Experimental and numerical Validation of the Radionuclide Inventory in irradiated High Burn-Up UOX and (U, Pu)OX pressurized Water Reactor Fuel Claddings	10
2.7	Belgian SNF Ageing Management Program Strategy	12
2.8	BGZ's Research Programme - Update and Overview	13
2.9	Cooling Rate Impact on Hydride Reorientation Embrittlement,.....	14
2.10	Influence of Solid Solution Hydrogen on Zircaloy-4 Softening	17
2.11	Muography for the Inspection of Dual-Purpose Storage Casks - Status Quo, Perspectives and GRS Activities	18
2.12	Radiation-based non-invasive Monitoring Methods for Transport and Storage Casks	20
2.13	BGZ Research Activities on Muon Radiography	21
2.14	Update on the GRS Interim Storage Project BREZL-II	23
2.15	Development of an AGR Fuel Drying Rig.....	27
2.16	Cohesive Zone Modelling Approach on irradiated Claddings subjected to long-term Dry Interim Storage.....	29
2.17	Update of the Experimental Work in the Framework of the SPIZWURZ Project	30

2.18	Update of Neutron Radiography Experiments in the Framework of the SPIZWURZ Project.....	32
