

Contents

1	Introduction	1
1.1	Introduction	1
1.1.1	Digital Exclusion	2
1.1.2	Digital Divide	3
1.1.3	Digital Equality	4
1.1.4	User Interface	5
	Character User Interface	5
	Menu Driven Interface	6
	Graphical User Interface	6
	UI / UX	7
1.2	Need of the Study	8
1.3	Objectives of the Study	9
1.4	Research Methodology	9
1.5	Chapters' Plan	10
2	Literature Review	13
2.1	Web Applications & Development Frameworks	13
2.1.1	Web-Based Applications	14
2.1.2	Mobile-Based Applications	15
2.1.3	Responsive Web Design	16
2.1.4	Parameters affecting User Interface	18
2.1.5	Principles of UX	19
2.1.6	Bootstrap	22
	Features	23
	Structure and Functions	23
	Stylesheets	23
	Code or Components Re-usability	23
2.1.7	WordPress	24

Themes	24
Plugins	25
Other Features	25
2.1.8 Joomla	26
2.1.9 Drupal	26
2.1.10 Django	27
2.1.11 Angular JS	28
2.1.12 Node.js	28
2.1.13 React	29
2.2 Related Work	29
2.2.1 Frameworks	30
2.2.2 User Interface	33
2.2.3 Usability and Acceptability	34
2.2.4 Implications of a Bad User Interface	37
2.2.5 Towards Mobile Devices	39
2.2.6 Responsive Applications	41
2.2.7 Effect of Gender, Age & Education on UI	42
2.2.8 Personalized System	48
2.2.9 Human-based Computation (HBC)	49
Usability of HBC CAPTCHA	50
2.3 Conclusion	52
3 Research Methodology	53
3.1 Introduction	53
3.2 Sampling Techniques and Sample Size	55
3.3 Data Collection Tools	55
3.3.1 Questionnaire	56
Question Type	56
Question Sequence	56
Basic Rules for Questionnaire Item Construction	56
3.3.2 Validation of Questionnaire	57
Face Validity	58
Pilot Test	58
Data Cleaning	58
Principal Components Analysis	58

	Reliability of Dataset	59
3.4	Research Tool	60
	R Language	60
4	Evaluation of Web Development Frameworks	61
4.1	Shackel's Acceptability Paradigm	62
4.1.1	Evaluation of Frameworks	63
4.2	Analysis	64
4.2.1	Evaluation of "Home Page"	65
4.2.2	Evaluation of "About DCSA"	65
4.2.3	Evaluation of "Contact-Us"	66
4.2.4	Identification of Factors Affecting Performance	67
4.2.5	Limitations of Web Development Frameworks	68
4.3	Conclusion	69
5	Identification & Analysis of UI/UX Factors using Web-portals	71
5.1	UI/UX Evaluation	71
5.1.1	Heuristic Evaluation of UX Design	72
5.1.2	User Testing	74
5.2	Analysis of various UI/UX Factors	77
5.2.1	Home Page	78
5.2.2	Appropriateness of Contents	79
5.2.3	Background Colours	80
5.2.4	Number of Menus	81
5.2.5	Name of Menus / Items	82
5.2.6	Size of Contents	83
5.2.7	Size of Hyperlinks and Clickable Area	84
5.2.8	Title of Webpages	85
5.2.9	Responsiveness	86
5.2.10	Traceability of Website Contents	87
5.2.11	Appropriateness of Contents and Hyperlinks	88
5.2.12	Availability of only Appropriate and Related Contents	89
5.2.13	Responsiveness and Appropriate Size of Images	90
5.2.14	Ease of Use	92
5.2.15	Utility - Functional Efficiency	93
5.2.16	Likability	94

5.2.17	Navigation System	95
5.2.18	Compatibility with Browsers	96
5.2.19	Quality of Websites	97
5.2.20	Grammatically Correct and up to date Contents	98
5.2.21	Traceability of Contact-Us	99
5.2.22	Domain of Websites	100
5.3	Conclusion	101
6	Factors affecting the User Interface: User Perception	103
6.1	Analysis of Effect of Gender	106
6.1.1	Font Size	106
6.1.2	Font Colour	107
6.1.3	Background Colour	108
6.1.4	Font Style	109
6.1.5	Menu Type	109
6.1.6	Page Format	110
6.1.7	Depth of Menus	111
6.1.8	Appearance of Latest Updates	112
6.1.9	Image Appearance	113
6.1.10	Some General Preferences about User Interface	114
6.2	Analysis of Effect of Age Groups	116
6.2.1	Font Size	116
6.2.2	Font Colour	117
6.2.3	Background Colour	118
6.2.4	Font Style	119
6.2.5	Menu Type	120
6.2.6	Page Format	121
6.2.7	Depth of Menus	123
6.2.8	Appearance of Latest Updates	124
6.2.9	Image Appearance	125
6.2.10	Some General Preferences about User Interface	126
6.3	Analysis of Effect of Education	128
6.3.1	Font Size	128
6.3.2	Font Colour	129
6.3.3	Background Colour	130

6.3.4	Font Style	131
6.3.5	Menu Type	132
6.3.6	Page Format	133
6.3.7	Depth of Menus	134
6.3.8	Appearance of Latest Updates	135
6.3.9	Image Appearance	136
6.3.10	Some General Preferences about User Interface	137
6.4	Conclusion	139
7	Proposed Framework & it's Validation	141
7.1	An Extended Shackel's Acceptability Paradigm	141
7.1.1	Shackel's Acceptability Paradigm	142
	Usability	143
	Cost of Getting it Wrong	145
	Slow Response Time	146
7.1.2	Caching	146
	Browser Caching	147
	DNS Caching	147
	DNS Cache Poisoning	148
	Whaling	148
7.1.3	Proposed Framework	149
7.2	Set of Guidelines	152
7.3	Conclusion	155
8	Conclusion & Future Scope	157
8.1	Major Findings	158
8.2	Conclusion	161
8.3	Future Scope	163
