

TABLE OF CONTENTES

TABLE OF CONTENTES	1
ABBREVIATIONS	5
1. INTRODUCTION	6
1.1 Dual lifestyle of <i>Staphylococcus epidermidis</i>	6
1.1.1 History of <i>Staphylococcus epidermidis</i>	6
1.1.2 Benefits of <i>S. epidermidis</i> colonization	6
1.1.3 Costs of <i>S. epidermidis</i> infection	7
1.2 <i>S. epidermidis</i> ' commensal and pathogenic properties and their transition	8
1.2.1 <i>S. epidermidis</i> pathogenic properties.....	8
1.2.2 <i>S. epidermidis</i> adapts to diverse environments based on its genetic diversity and flexibility	9
2. RESEARCH OBJECTIVE	11
3. MATERIALS AND METHODS	12
3.1 Materials	12
3.1.1 Lab instruments	12
3.1.2 Plastic material	12
3.1.3 Buffer and reagents	13
3.1.4 Chemicals	14
3.1.5 Medium	14
3.1.6 Self-made solutions.....	15
3.1.7 Kits.....	15
3.1.7.1 Kits procedure	16
3.1.7.1.1 DNase I recombinant, RNase-free Kit procedure	16

3.2.13.1 Bacterial gene expression quantification.....	35
3.2.13.2 Quantification of host genes	35
3.2.14 Statistical analysis.....	35
4. RESULTS	37
4.1 Transcriptional patterns of <i>S. epidermidis</i> during skin adaptation	37
4.1.1 Experimental setup.....	37
4.1.2 Validation of the model	38
4.1.3 Transcriptional adaptation of <i>S. epidermidis</i> to human skin.	40
4.2 Comparative analysis of the transcriptional profiles of <i>S.</i> <i>epidermidis</i> during colonization and infection	43
4.2.1 Experimental setup.....	43
4.2.2 Comparative analysis of the transcriptional profiles of ex vivo skin samples and nasal colonization of patients with PJI	44
4.2.3 Comparison of transcriptional profiles between patient colonization and infection	48
5. DISCUSSION.....	52
6. SUMMARY	56
7. REFERENCE.....	57
8. Appendix.....	65
9. Acknowledgment	73
10. Affidavit regarding data retention.....	74
11. Affidavit according to § 5 (1) § 11 (3) 12 of the doctoral studies regulations.....	75
12. Curriculum vitae.....	76
