1 Introduction	1
1.1 Existing research on concessives in English	2
1.2 Concessives as constructions	3
1.3 Aims, scope and structure of the study	5
1.4 Open data	8
2 Concessive clauses: Development, function and form	9
2.1 Historical background	9
2.1.1 General aspects	10
2.1.2 The histories of <i>although</i> , <i>though</i> and <i>even though</i>	13
2.2 Semantic types of concessives	14
2.2.1 Anticausal concessives	18
2.2.2 Epistemic concessives	19
2.2.3 Dialogic concessives	21
2.2.4 Narrow-scope dialogic concessives	24
2.3 The syntax of concessive subordination	25
2.3.1 Syntactic ordering	27
2.3.2 Clause types	30
2.4 Summary	33
3 Corpus examples	35
3.1 Anticausal concessives	36
3.2 Epistemic concessives	39
3.3 Dialogic concessives	42
3.4 Semantic ambiguity	47
3.5 Further notes on syntax	50
3.6 Summary	52

4	Dimensions and mechanisms of variation	55
4.1	Constructions and constructional variation	55
4.1.1	Constructions and Construction Grammar	56
4.1.2	Constructions and the usage-based approach	58
4.1.3	A choice model of constructional variation	61
4.2	Mode of production	64
4.3	Varieties of English	67
4.3.1	General aspects	67
4.3.2	Models of English	68
4.4	Summary	73
5	Previous findings and research questions	75
5.1	Previous research	75
5.1.1	Frequencies of conjunctions	76
5.1.2	Semantics	79
5.1.3	Clause position	82
5.1.4	Clause types	86
5.2	Summary and identification of research gaps	87
5.3	Research questions and hypotheses	87
6	Methodologies	93
6.1	The <i>International Corpus of English</i> (ICE)	93
6.2	Data retrieval and annotation	96
6.3	Mixed-effects Bayesian regression models	98
6.3.1	Hierarchical data structures	99
6.3.2	Bayesian statistics	101
6.3.3	Types of regression used in this study	105
6.3.3.1	Negative binomial count regression	106
6.3.3.2	Binary logistic regression	107
6.3.3.3	Multinomial logistic regression	108
6.3.4	Comments on random effects and centred predictors . .	109
6.3.5	Estimation and visualisation	110
6.3.6	Specification of variables and model selection	112
7	Frequencies of conjunctions	115
7.1	Overview: Frequencies of different concessive markers	116
7.2	Statistical model	117
7.3	Results	118
7.4	Summary and discussion	125

8	Frequencies of semantic types	129
8.1	Statistical model	130
8.2	Results	130
8.3	Summary and discussion	134
9	Clause position	137
9.1	Statistical model	137
9.2	Results	138
9.2.1	Average percentages	139
9.2.2	Semantics	142
9.3	Summary and discussion	147
10	Choice of conjunction	151
10.1	Statistical model	151
10.2	Results	152
10.2.1	Average percentages	152
10.2.2	Semantics	157
10.2.3	Clause position	162
10.2.4	Complete factor combinations	167
10.3	Summary and discussion	175
11	Clause structure	179
11.1	Statistical model	179
11.2	Results	180
11.2.1	Average percentages	180
11.2.2	Semantics	182
11.2.3	Clause position	184
11.2.4	Markers	189
11.2.5	Complete factor combinations	192
11.3	Summary and discussion	198
12	Conclusion and outlook	201
12.1	Summary of results	202
12.1.1	Frequency-based accounts: Uses and limitations	203
12.1.2	Multifactorial analyses at different levels	205
12.1.3	A marker-based summary	209
12.2	Wider contexts of investigation	211
12.2.1	From constructional subset to complete inventory	212
12.2.2	Expanding the functional dimension	213

Contents

12.2.3	The diachronic dimension	214
12.2.4	More varieties and predictors?	216
12.3	Concessives and Construction Grammar	217
12.3.1	Constructions as hierarchical choices	217
12.3.2	Alternative models of constructional variation	219
12.3.3	Processes in constructional variation and change	223
12.4	In conclusion	225
Appendix A: Data summary (ICE)		227
A.1	Corpus design	227
A.2	Word counts	229
A.3	Token numbers	229
Appendix B: Statistical models		233
B.1	Model A: Frequencies of conjunctions (Chapter 7)	233
B.2	Model B: Frequencies of semantic types (Chapter 8)	233
B.3	Model C: Clause position (Chapter 9)	234
B.4	Model D: Choice of conjunction (Chapter 10)	235
B.5	Model E: Clause structure (Chapter 11)	235
