Abstract II

Kurzfassung III

Contents.....IV

List of Symbols and Abbreviations VII

List of FiguresXI

List of Tables..... XV

1 Introduction..... 1

1.1 Motivation and problem statement..... 1

1.2 Research objective and work structure..... 7

2 Battery Production and Traceability Systems 10

2.1 Battery Production Systems 10

2.1.1 Lithium-ion Battery and Battery Components..... 10

2.1.2 Production Management..... 13

2.1.3 Battery Cell Manufacturing 16

2.1.4 Digitalization in Battery Production Systems..... 20

2.2 Traceability within Production Systems..... 22

2.2.1 Quality Management in Battery Production Systems..... 22

2.2.2 Traceability 23

2.2.3 Elements and Functions of Traceability Systems 26

2.2.4 Data Management in Traceability Systems 27

2.3 Preliminary Findings 31

3 State of Research – Existing Approaches 33

3.1 Definition of Scope and of Evaluation Criteria..... 33

3.1.1 The Scope of Literature Review 33

3.1.2 Definition of Evaluation Criteria 35

3.2 Review and Evaluation of Research Contributions..... 46

3.2.1 Contributions to Determination of Traceable Resource Units..... 47

3.2.2 Contributions to Identification of Critical Traceability Points 49

3.2.3 Contributions to Determination of Identification Method 52

3.2.4 Contributions to Linking of Information and Data Sources 54

3.2.5 Contribution to Quality Management in Manufacturing Systems..... 58

3.3 Summary of Literature Review and Derivation of Research Demand..... 62

4 Traceability System for Battery Production 66

4.1 Derivation of Objectives and Requirements..... 66

4.2 Development of a Framework 70

4.2.1 Scope within Battery Cell Production Systems 70

4.2.2 Framework for an integrated Quality Management and Traceability System 72

4.3 Information Traceability Module 74

4.3.1 Stakeholder Analysis and Definition of System Requirements..... 75

4.3.2 Deployment Strategy 77

4.4 Object Traceability Module..... 79

4.4.1 Definition of Scope and System Boundaries 79

4.4.2 Assessment of System Elements and Derivation of Challenges..... 80

4.4.3 Object Traceability Principles 83

4.5 Data Access and Structuring Module 91

4.5.1 Data Acquisition and Consolidation 91

4.5.2 Data Access and Structuring Principles..... 94

4.6 Cyber World..... 102

4.6.1 Feature-based Electrode Sector Identification..... 103

4.6.2 Detection and Classification of Electrode Coating Defects..... 110

4.7 Data Interpretation Module 114

4.7.1 Visualizations 116

4.7.2 Diagnostics / Error Tracing 118

4.7.3 Virtual Quality Gate 118

4.7.4 Adaptive Production Control..... 119

5 Prototypical Implementation 121

5.1 Object Traceability and Data Acquisition 121

5.2 Data Interpretation..... 126

6 Exemplary Traceability Implementations 129

6.1 Application of Information Traceability Module 129

6.2 Production management 135

6.3 Energy management..... 143

6.4 Data Analyst..... 152

7 Summary, Critical Review and Outlook..... 156

7.1 Summary 156

7.2 Critical Review..... 159

7.3 Outlook and Future Research 161
