Preface	ix
1 Reading as Skilled Information Processing	1
Information and knowledge	6
<i>The knowledge available to the skilled reader</i>	7
The processing of information	9
<i>Theories of pattern recognition</i>	10
<i>Serial or parallel processing of letters?</i>	12
<i>Accessing the mental lexicon</i>	12
<i>Spelling-to-sound correspondence rules</i>	15
<i>Regularize the spelling-to-sound correspondences?</i>	21
<i>Memory support for reading</i>	24
Skilled information processing	28
<i>Automatic word recognition: Stroop tasks</i>	30
<i>Automatic word recognition: access to meanings</i>	32
<i>Attention and reading</i>	34
2. Cognitive Processes in Word Recognition	37
Sources of variation in lexical access	39
<i>Word frequency</i>	39
<i>Non-word legality effect</i>	40

Contents

<i>Lexical status effect</i>	40
<i>Pseudohomophones</i>	40
<i>Word superiority effect</i>	41
<i>Context</i>	42
<i>Repetition priming</i>	43
<i>Word similarity</i>	44
<i>Ambiguity</i>	44
Models of word recognition: word detection with lexical units	45
<i>The logogen model</i>	46
<i>How many logogen systems are necessary?</i>	52
<i>What constitutes a logogen unit?</i>	54
<i>Dual routes to the internal lexicon</i>	55
Models of word recognition: word detection through connectionist networks	57
<i>The interactive-activation model</i>	58
Models of word recognition: word recognition with lexical search	62
<i>The access code</i>	63
<i>Accounting for the data with a lexical search model</i>	66
<i>Word recognition with a verification process</i>	69
<i>Size of the search set</i>	70
<i>Locus of the frequency effect</i>	71
Assessing models of word recognition	72
3. Reading Development and Reading Difficulties	
Individual Differences in Acquisition and Skill	74
Phonics and the use of spelling-to-sound rules	75
Reading as a psycholinguistic guessing game	78
Reading skill and the use of context	79
<i>The two-process model of context effects</i>	81
<i>Neely's primed lexical decisions</i>	83
<i>Two processes in West and Stanovich's experiments</i>	85
<i>Reducing a reader's level of skill</i>	86
<i>Additive and interactive effects and Becker's verification model</i>	89
Phonological awareness and phonological memory	96
<i>Syllables, phonemes or intra-syllabic units?</i>	97
<i>Phonological awareness training</i>	100
<i>Phonological awareness for beginning readers</i>	102
The role of memory in reading development	104
Reading skill and the use of inferences	108
Individual differences in reading development	109

4. Neuropsychological Studies of Reading	111
The acquired dyslexias	112
Types of acquired dyslexias	112
<i>Letter-by-letter dyslexia</i>	113
<i>Phonological dyslexia</i>	114
<i>Surface dyslexia</i>	114
<i>Deep dyslexia</i>	115
Lexical and nonlexical routes to pronunciation	116
<i>Dual routes to meaning and pronunciation</i>	118
<i>Grapheme-phoneme correspondence theory</i>	119
<i>The lexical route</i>	119
<i>The nonlexical route</i>	120
<i>A single route to meaning and pronunciation</i>	124
Is the lexicon morphemically organized?	131
<i>The morphemic decomposition hypothesis</i>	132
The developmental dyslexics	134
<i>Jorm's approach: similarities with the deep dyslexics</i>	135
<i>Ellis's approach: similarities with the surface dyslexics</i>	136
<i>A misinterpretation?</i>	139
<i>The division into subgroups</i>	140
Contributions from the neuropsychology of reading	142
 5. The Role of Eye Movements in Reading	 144
<i>Eye movement measurements</i>	148
Processing during fixations	149
<i>Post-fixation processing</i>	150
<i>On-line processing of individual words</i>	150
<i>On-line processing of words within sentences: context effects</i>	152
<i>On-line processing of words within sentences: effects of parsing difficulty</i>	154
<i>Parafoveal processing</i>	161
Theories of eye guidance	166
<i>The minimal control hypothesis</i>	166
<i>Visual control hypothesis</i>	166
<i>Linguistic control hypothesis</i>	171
<i>Nonlexical guidance</i>	171
<i>Lexical and semantic guidance</i>	173
<i>Morphemic guidance</i>	174
Individual differences in reading	176
<i>Reading ability and experience</i>	176
<i>Speed readers and the perceptual span</i>	179
<i>Poor readers and developmental dyslexics</i>	181
<i>Eye movements: cause, effect or a parallel phenomenon of dyslexia?</i>	181
On-line processes in reading	188

Contents

6 Reading Comprehension	189
From Words to Propositions and Inferences	
Thinking while reading	190
<i>Resolving anaphoric references</i>	191
<i>Anaphors and mental models</i>	193
From words to propositions	196
<i>Sentences and ideas</i>	197
<i>The propositional analysis of text</i>	199
<i>Individual differences in the use of propositions</i>	203
From propositions to inferences	206
<i>Elaborative inferences</i>	208
<i>Causal inferences</i>	211
Words, propositions, inferences, and the reader's mental model	216
 References	 218
 Subject Index	 237
 Name Index	 241
