The Pulmonary Vasculature in Chronic Lung Disease

 Humana Press

 **ATS** American
Thoracic
Society

Contents

1	Lung Endothelial Cells and Their Heterogeneity in Chronic Lung Diseases	1
	Geoffrey Newcomb and Laszlo Farkas	
2	Pericytes and Smooth Muscle Cells in the Pathogenesis of Pulmonary Arterial Hypertension	13
	Timothy Klouda, Yunhye Kim, and Ke Yuan	
3	Fibroblasts in Pulmonary Vascular Disease	33
	Hui Zhang, Min Li, Cheng-Jun Hu, and Kurt R. Stenmark	
4	Biology of Extracellular Matrix in Pulmonary Vascular Pathology Associated with Chronic Lung Diseases	51
	Toyoshi Yanagihara, Kohei Otsubo, and Martin R. J. Kolb	
5	Imaging in Pulmonary Hypertension Associated with Chronic Lung Disease	73
	Andrew J. Synn and Farbod N. Rahaghi	
6	Omics and Precision Medicine Approaches in Pulmonary Vascular Diseases Associated with Chronic Lung Disease	87
	Kevin Schwalbach and Anna R. Hemnes	
7	RV/PA Coupling in Pulmonary Hypertension Secondary to Chronic Lung Disease	99
	Fatima Zeba, Paul M. Heerdt, and Inderjit Singh	
8	The Pathophysiology, Diagnosis, and Clinical Impact of Pulmonary Hypertension in Emphysema, COPD, and Smoking-Related Lung Disease	109
	Lucilla Piccari, Aparna Balasubramanian, Karys Khilzi, Mona Lichtblau, and Diego A. Rodríguez Chiaradía	

9	Pulmonary Hypertension Complicating Interstitial Lung Disease: Current Concepts and Controversies.	137
	Christopher S. King and Christopher Thomas	
10	Pulmonary Hypertension Associated with Sarcoidosis	161
	Alexander Liu, Vasilis Kouranos, and Laura C. Price	
11	PVD Associated with ARDS and Post-COVID Syndromes.	181
	Vaughn Craddock, Sahil Pandya, Leslie Spikes, and Navneet Kaur Dhillon	
12	Pulmonary Vascular Disease Associated with Other Parenchymal Lung Diseases.	203
	E. H. Louw, J. K. van Heerden, A. Buckley, and B. W. Allwood	
13	Pulmonary Vascular Disease Associated with Hypoxemia and High Altitude	247
	Lindsay M. Forbes and Kurt R. Stenmark	
	Index.	267
